1. In the night bombing of LONDON on 24th August fires were caused in ENFIELD, the CITY (MOORGATE) and the Docks. Altogether up to 300 aircraft in groups of 40-80 aircraft took part in the raids on the LONDON area; 50 percent of them were fighters. A high percentage of incendiaries was dropped and heavier bombs than before are being used. Some bombs were said to be full of heavy oil and caused no harm. Until midday on 24th August the SAUSAGE-DEALERS [KOLBASNIKI][i] bombed aerodromes in KENT, then aerodromes around LONDON and towards the evening they bombed LONDON, PORTSMOUTH and RAMSGATE. The press reports that the SAUSAGE-DEALERS are using 3,000 aircraft, i.e. one sixth of their operational aircraft, against Britain. SAUSAGE-DEALERS tactics this week – mass air-raids by day and 1-4 aircraft each night which penetrate to a large town and keep the air defence on the alert all night.

2. WRITER [PISATEL'][ii] has reported that large anti-tank obstacles and concrete blockhouses are being set up in the coastal zone. All the bridges in the zone are mined. In HARWICH there are four infantry battalions, two engineer companies, three artillery batteries and five A.A. batteries. The aerodrome has been bombed. The SAUSAGE-DEALERS appeared unexpectedly on the tail of returning fighters and the air defence was slow in noticing them. In HARWICH [1 group garbled] three wooden submarines. He has heard that the SAUSAGE-DEALERS have bombed decoy ships of this kind in SCAPA FLOW. The port is protected by 30 barrage balloons. In the port there are 12 destroyers which the British are using for [1 group unidentified] medium [B% size] sea mines [B% of which] they have 7,500

[ii] LOUISA: Almost certainly an error by MOSCOW for MUSE [MUZA]. In No. 949 of 27th August 1940 LONDON asked for MUSE’s radio schedule for several months and for cipher instructions; this message is on an appropriate date to be MOSCOW’s reply. Furthermore, paragraph 3 of LONDON’s No. 987 of 6th September 1940 (the day after the present message was repeated) acknowledges receipt by MUSE “yesterday” of a 30-group message: the present message is 30 cipher groups long. The error can be explained by the similarity between MUZA and LUIZA in Cyrillic longhand.

MOSCOW’S INSTRUCTIONS FOR MOBILISATION OF AGENTS
(THE X GROUP, BAUER, CARPENTER, MINISTER AND THERAPEUTIST)
AND ESTABLISHMENT OF CONTINUOUS RADIO COMMUNICATION
(1940)

From: MOSCOW
To: LONDON
No. 450 7th Sept. 40

To BARCh [i].

[Part I of a multi-part message][a]

Herewith my order for the months of September and October:

ORGANISATIONAL WORK
1. By 20th September complete the formalities on the X GROUP [GRUPPA IKS][ii] comprising three military sources and start to obtain documentary material [MATERIAL].

2. By 25th September set up systematic collection of intelligence [INFORMATsIYa] and documents from BAUER [BAUER][iii].

3. By 25th October bring [the strength of][b] CARPENTER’s [PLOTNIK][iv] group up to five people from among the military personnel of the LODNON Garrison [c].

4. By 30th October increase [the strength of][b] MINISTER’s [MINISTR][v] group by two people by recruiting employees on the staff of the military department [VOENNOE VEDOMSTVO][d].

5. By 14th September finally get the radio sets working properly and establish continuous radio communication.

INTELLIGENCE
1. By 14th September get documentary information through THERAPEUTIST [TERAPEVT][vi] or others on the officer career structure in the Air Force and on the methods of retraining Air Force cadres.

2. By 20th September supply information on the measures being taken
against an invasion by the German army (the system of defence works, coastal
defence), sending maps and details at the next opportunity. Continuation
follows [a].

1. Tommy-guns are automatic submachine guns:
   - Calibre: .45 inch
   - Weight: 4.2 kilograms
   - Length: 33 inches
   - 1,500 rounds a minute
   - 50-round magazine
   - Effective range: 70 metres.

   They are intended for use against parachute landings.

2. Yesterday [we][a] drove past two military airfields. Blockhouses with machine guns have been erected along the airfield boundaries. There are two rows of barbed wire joining the blockhouses and surrounding the airfields. There are [Fairey][a] Battles at BENSON airfield and Hurricanes at NORTHOLT. They all have Anglo-French markings. NearCOVENTRY patrols are being carried out by flights of Hurricanes.

3. On the roads are police armed with rifles. The troops are stationed in concealed camps in woods and copses. Carts with their shafts pointing upwards and agricultural machines have been left standing in fields under cultivation.

1. The opinion is being spread by the press and official circles that in the near future a great event may be expected in the Mediterranean area and in the BALKANS. It is emphasised that the expected event is connected with the conflict of interests between the USSR and GERMANY on the DANUBE and in the MEDITERRANEAN. Influential Englishmen have already declared to the MASTER[KhOZYaIN] of the METRO[ii] that they are not against the Straits being held by the USSR. The position is worse in South Wales where the daily raids are keeping the population in a constant state of tension. As well as in this area there is particularly serious damage in HARTLEPOOL.

1. According to information from MARTHA[MARTA][I] and from the press, JEROME[ZhEROM][ii] is successfully consolidating his position in the French group here. At the moment he is busy organizing French technical [I group unrecovered] for the requirements of the British war industry. He has already been received by the Minister of Supply and has a letter of recommendation to another minister. The press writes about him favourably and puts him third in order after General de GAULLE[iii].

2. In spite of my tact, they were both[a] somewhat surprised by the nature of my questions and assignments. Previously he provided only political intelligence [INFORMATsIYa], while she worked in the international Trade Union movement. Comrade ShVERNIK[iv] apparently knows her through this work. I explained to them that they both had opportunities of helping us. She was formerly a member of the German CORPORATION[KORPORATsIYa][v] and though he is not a member of the Party, he is sympathetic towards us and he was in SPAIN.

3. He will [B% continue] with the General until [he receives][b] your [C% instructions][vi]. If [I group unrecovered] he will go where you instruct him [to go][vii]. MARTHA declares that around JEROME and her husband a group of Frenchman [B% is forming] who might agree to any sort of negotiations directed against Fascism[vii]. JEROME is taking steps to get an officer friend of his nominated to the post of Commander of the Air Force[viii]. In order to carry out your assignment JEROME will collect material under the pretence of writing a book on the subject of the defeat of GASTRONOMIA[GASTRONOMIYa][ix].

[Continued overleaf]
4. Last night MARTHA passed me some material [on][b] an invention by a French
engineer for the improvement of bombing. This material is due to be handed over
to the British. This morning the material was returned after being photographed.
The material is in French and is accompanied by the appropriate drawings.
Having formerly worked in the Ministere de l'Air [MINISTERSTVO AVIATsII][x],
JEROME snapped up the material.

5. JEROME used to be paid according to the job in GASTRONOMIA. I confirmed that
this would go on here as well. Apparently MARTHA did not get anything before,
apt from occasional help from CACHIN[KAShEN][xi]. Since she will get very
little as JEROME's secretary, I promised to give her financial support.
Politically she is stronger than JEROME and influences him.

6. We came to an agreement that contact would be through MARTHA only. JEROME,
incidently, speaks English badly. Please give [B% permission] to make
APTEKAR'[xii] or MARK[xiii] the contact with her.

in [b] the government and [C% elements] have reported that the British are preparing the ground for a possible agreement with Germany. Today a TIMES leading article says that from an historical point of view HITLER has made progress in the unification of Europe and Britain is making a mistake if she sets herself the task of restoring the old order and status quo in Europe and at home. GREENWOOD [i] stated to the MASTER of the METRO [KhOZYaIN METRO][ii] that the cause of this agreement was the Admiralty's statement that she [c] could not put up any opposition to Japan at present. There was no [C% reason] why Britain [B% should] not wish to have consultations with us and SAShA [iii] on this question.

2. The Secretary of State for Air [MINISTR AVIATaII] Sinclair [iv] gave the MASTER of the METRO the following information:

Not a single aerodrome has been knocked out nor has a single major military objective been destroyed as a result of all the German air-raids in July. Acquaintance with captured German fighter pilots and a study of shot-down materiel show that the Germans are at present using second-rate and very young fighter pilots against Britain. They have no good British maps or photographs of bombing targets. They are using photographs of targets which were used earlier for reconnaissance of the factories. He [1 group garbled][1 group unidentified] that the Germans had lost 104 aircraft in July against the British 26. This difference in losses is said to be attributable to the better training of the British pilots and the fact that the British fighters are more manœuvreable than the MESSERSCHMITTS. The (cont. overleaf
British are working on a fighter armed with cannons. SINCLAIR considers that the Germans have 5,000-6,000 first-line aircraft and up to 14,000 in reserve; the first line is being constantly reinforced. He considers that the British will catch up the Germans in aircraft production in three months.

JEROME [ZhEROM][v], by the way, has reported that the British are now producing 1,200 aircraft a month. According to information in the press the Germans are producing 60 aircraft per day.

1. The existence of British Army infantry divisions bearing the following numbers has recently been noted: 5, 12, 18, 23, 49, 50, 51 and 52. This suggests that the British are assigning new divisions those numbers [in the series][a] 1-8 and 42-44 which were not taken up in peacetime by the regular divisions or territorial divisions [respectively][a].

2. JEROME [ZhEROM][i] has reported that the Germans used incendiary bombs on the hangars to [B% strike against] the Allies’ aircraft in the first days of the advance into France. This forced the Allies to move out into the fields. A journey round the country confirms that this experience has been made use of in the United Kingdom [METROPOLIYa]. New aerodromes have no hangars. The aircraft are out in the open and are camouflaged.

1. The retirement of General IRONSIDE and the appointment of GORT to the second-rate post of Inspector [General] of Training are looked upon here as routine measures of CHURCHILL’s to strengthen his position in running the war. The departure from leading positions of generals who belonged politically to the CHAMBERLAIN group should ease EDEN’s position. The press has taken up a favourable attitude, stressing that generals with battle experience in France have been promoted to higher appointments.

2. One of the Minister of Labour’s assistants [by the name of] LITTLE [LITLL][i] has passed [b] the following to the MASTER of the METRO [KhOZYaIN METRO][ii]:

A. There are altogether 16 aircraft factories in production. A further 15 aircraft factories will have been started up by 1st October. The latter will produce 500 aircraft a month and a maximum of 1,000 aircraft. Britain’s total output at present appears to be 2,400 aircraft (presuming that these figures are exaggerated [sic]).

B. Industry is [B% experiencing] the following difficulties: A lack of steel because of the loss of the Swedish and Spanish ore. Local ore is available in sufficient quantities, but it is exceptionally poor and two months are needed to develop its mining. Difficulties in organizing the cooperation of private enterprise. Machine tools are actually working at 50 percent [load][a]. It has been decided to reduce the working day to 10 hours with overtime, instead of the former 12 hours, since with the increase in the working day production has fallen by seven [1 group unidentified][c] percent.

1. The build-up of the General’s [i] forces is proceeding slowly (one division, 80 aircraft and 300 fighter pilots). It is being [adversely][a] affected by the absence of political [1 group unidentified] in the Movement and by the lack of action on the part of the British Government, which is striving to maintain links with the PETAIN government.

2. MARTHA [MARTA][ii] has reported that in the near future the British Government will ratify the statute on the General’s position: she will give us a copy. The General is getting one aircraft factory and one explosives factory established since there are specialists in these fields available.

3. I turned down as being unrealistic at present the following plan of JEROME’s [ZhEROM][iii]:
   A. To push the General towards the left.
   B. To organize industrial sabotage in France.
   C. To organize an anti-fascist newspaper for distribution in GASTRONOMIA [GASTRONOMIYa][iv].

4. I explained that the General and the whole Movement were in the hands of the British, who were putting their money on him. If they turned the General into a revolutionary everything would fall to the ground. I said that the way to help GASTRONOMIA was to help us with [B% intelligence [INFORMATsIYa]] and copies of [B% new technical items]. JEROME must get the war factories established so that [he has access to][a] documentary material [MATERIALY] relation to their products and can pass [b] it to us.

INTELLIGENTSIA AND THE X GROUP (1940)

I have met representatives of the X GROUP [GRUPPA IKS][i]. This is
[a]        [ii]                          [iii]),
. He reported that he had been detailed to organize work with me, but that he had not yet obtained a single contact. I came to an agreement with him about the work and pointed out the importance of speed. He (INTELLIGENTSIA [INTELLIGENTsIYa][iv]) reported the following:

1. HITLER’s speech [v] will not make a great impression here. The press has taken it unfavourably. He considers that the SAUSAGE-DEALERS [KOLBASNIKI][vi] were given their answer earlier by CHURCHILL since the SAUSAGE-DEALERS’ conditions passed to the British through KhOSKhOR [vii] and WILSON [viii] proved unacceptable. HALIFAX’s speech [ix] was not only an additional answer to the SAUSAGE-DEALERS but [also][b] the outline of a political programme. The slogan “For Christianity” is similar to one of the conditions in ROOSEVELT’s declaration on the freedom of religion, will also impress PÉTAIN, FRANCO and the Pope and has an anti-fascist edge [to it][b]. INTELLIGENTSIA considers that there is an anti-SAUSSAGE-DEALER mood in the army and the knowledge [of this][b] is so strong that the Conservative Party is afraid of risking talking about peace. They might start talks if Britain were to suffer some serious defeat of the SAUSAGE-DEALERS start effective bombing. CHURCHILL continues to stay the main figure of the war in the SAUSAGE-DEALERS’ eyes, but he intends [c] but is supporting CHAMBERLAIN’s group so as to give the anti-SAUSSAGE-DEALER mood no chance of developing into a movement of the left.
2. Generals IRONSIDE [x] and GORT [xi] were removed from the leadership because at a parliamentary [C% secret session] on the question of the cause of the defeat in FLANDERS the Minister of Supply proved with documents that the Expeditionary Force [EKSPEDITsYa] was supplied 100 percent in accordance with the instructions of these generals, who are personally responsible for the [B% development] of the mechanized armies.

GERMAN AIR-RAIDS AND BOMBING TACTICS (1940)

From: London
To: Moscow
No: 818 27th July 40

To JOHN [DZhON][i].

1. On 22nd and [B% 23rd] July there were German air-raids night and day by individual Do-17’s and 18’s on the THAMES Estuary, South Wales and South-East England [using][a] incendiary and fragmentation bombs [ii].

2. On 24th July in the morning and throughout the day He-111’s and 113’s, Do 17’s and 215’s, Me 109’s and 110’s, and American VOUGHT 156’s (captured in France) [B% bombed] shipping and dropped mines on the south coast of England. Formation [used][a] in one of this day’s raids: at a height of 1,500 metres 18 bombers in V-formation, three Me-109’s above and behind, and above them a group of He-113’s.

3. There were no air-raids at night on 25th July. In the morning about 100 aircraft bombed shipping in south-east England. In the afternoon 19 Do-17’s and 12 Me-109’s bombed shipping from a height of 4,000 metres. In the evening 30 Ju-87’s accompanied by 50 Me-109’s bombed shipping.

4. Technique of one bombing attack on shipping: 20 Ju-87’s dived one after another from a height of 1,000 metres. Having dropped their bombs they came out of their dive at a height of 300-400 metres, did a loop or an IMMELEMAN turn and bombed for a second time. They were accompanied by two layers of fighters, the first at a height of 2,000-5,000 metres and the second at 6,000-7,000 metres, to take on the British fighters.

5. It has been noted that German aircraft have begun to be equipped with rubber dinghies.

To DIRECTOR.

1. According to information from a [C% correspondent][i] the Army's morale is very uncertain. Although they are in the mood to fight the SAUSAGE-DEALERS [KOLBASNIKI][ii] among the troops as a whole there is a fear that their leaders may let them down, as happened in FLANDERS; discipline is poor and there is a great longing to go on leave. The officers are complaining that the soldiers are demanding political lectures. The strongest left-wing sentiments [are to be found][a] among the soldiers who were in the British Expeditionary Force [EKSPEDITsIYa] and the 5,000 Czechoslovakian Troops left from the Czechoslovakian [B% divisions] in France. In the Air Force [VOZDUShNYJ FLOT] there is discontent with the latest statement from CHURCHILL and HEAVERBROCK about the allegedly large increase in the number of aircraft, because it deceives the public.

2. DALTON, the minister for Economic Warfare, has told the MASTER of the METRO [KhoZYaIN METRO][iii] that preparations are being made for giving INDIA dominion status. At the same time preparations are being made for increasing the Indian Army by 20-30 divisions through enlisting mainly the Moslems into the Army.

3. [B% 200,000] mechanized and motorized troops are concentrated in Northern Ireland. Everything is being prepared against a landing in Ireland if Eire [YuG] requires it.

2. ANTI-TANK OBSTACLES BEING REMOVED

3. INFORMATION FROM THE FRIENDS ON USE OF SIRENS

From: LONDON
To: MOSCOW
No: 851 6th Aug. 40

To DIRECTOR.

1. From July 1939 to date there have been 13 call-ups here covering persons born from 1920 back to 1906. Altogether over four million men have been registered. The percentage actually called up, however, is 50-60 percent. The rest of the British fall into the categories of people in reserved occupations, those released on [B% medical] grounds and "conscientious objectors". According to our information, in the United Kingdom [METROPOLIYa] there is probably an army of 1,000,000-1,2[8%]000 trained soldiers and 500,000-600,000 who have not yet completed their training. In addition there are up to 1,300,000 Home Guard [VNUITRENNYaYa OKhRANA] volunteers armed only with rifles. The structure of the forces is as follows:

War Office [VOENNOE MINISTERSTVO] and General Staff; subordinate to them is the C.-in-C. Home Forces [KOMANDUYuShahIJ VOJSKAMI METROPOLII]; below this are the General Officers Commanding Commands, to whom corps and divisions are subordinate.

2. The War Office is gradually starting to remove the anti-tank obstacles set up on the roads. Experience has shown that these obstacles restrict the movement of their own units and will also slow down any action by British mechanized units against the enemy. These obstacles are also disordering the economic life of the country.

3.7 According to information from the FRIENDS [DRUZ'Ya][i] the authorities are not using sirens during air-raids. Experience has shown that their use has a powerful effect on civilian morale and in any case their frequent use disrupts work in the war industry. In addition, the tactics of the SAUSAGE-DEALERS'[KOLBASNIKI][ii] air-raids in which 100 aircraft scatter all over the country led to a continuous noise of sirens in most of the country.

To JOHN [DZhON][i].

1. From [B% 1st] August to 7th August the German air-raids [were made][a] by aircraft operating singly and in small groups in various parts of the country day and night. The majority of them dropped leaflets but there were occasions when individual aircraft bombed with 10-kg incendiaries, each aircraft dropping 100 bombs [spread out][a] every 30 metres.

2. On 8th August the Germans bombed as reported by our radio [ii] yesterday. The height of the German air-raids was 6,000 and 9,000 metres. The Germans used metal nets to drop over British fighters.

3. The British are using barrage balloons [secured][a] directly on vessels in a convoy.

1. POULTRY-DEALER [KURNIK][i] has reported that the Area Secretary of the CORPORATION [KORPORATsIYa][ii] knows about the presence of a MUSIC [MUZEKA][iii] from BROWN [BRAUN][iv]. POULTRY-DEALER considers BROWN to be [B% devoted to our cause] but talkative. The arrangements I have made are:

A. BROWN will move to his old flat;
B. STANLEY [STENLI][v] will stop work [vi] for a fortnight and move to a flat in a different area.

2. Because of the hold-up in making the converter please transmit to us at 2100 hrs GMT on Thursdays for practice [DLYa OPYTA][a]. The receiver has been set up in the Military Attaché’s house where alternating current is available [vii]. MUSE [MUZA][viii] will transmit as planned on Fridays at 2100 hrs from the METRO [ix]. State [B% whether she was heard] on [1 group unidentified][b].

1. REPORT FROM JEROME

From: LONDON (1940)
To: MOSCOW
No.: 932 24th Aug. 40

To DIRECTOR.

1. JÉRÔME [ZhEROM][i] has had a talk with CHURCHILL’s private secretary. The latter stated that during the last three weeks morale had risen considerably in the ranks of the National [Coalition][a] Government [partly][a] as a result of the success of the R.A.F. [ANGLIJSKAYa AVIATsIYa] but mainly because of SASHA’s [ii] promise of support. As yet the British are receiving no more than 150 aircraft a month but they have been promised that this will shortly be increased to 300 aircraft a month.

2. With regard to the Air Force situation, the General [iii] stated that the British have upwards of 5,000 fighter aircraft. The bombing of Germany is being carried out by 200-250 aircraft. The fighter pilots who have been through a training course in Canada are efficient. There are plenty of trainer aircraft there and they do not begrudge [aviation][a] fuel. Apparently the French Air Force airfield at ODINKAM [b] was bombed four times by the SAUSAGE-DEALERS [KOLBASNIKI] [iv] but no serious damage was caused. He [c] considers the British figures of SAUSAGE-DEALER losses to be about right.

3. In a few days the main forces of the General and he himself are setting off to conquer the French colonies. In addition to 5,000 French troops, British units are also [B% being sent]. The exact destination is being kept secret: it is possibly DAKAR or BIZERTA. The General is satisfied with the British equipment supporting the coming offensive operation. JÉRÔME is remaining here.

4. THERAPEUTIST [TERAPEUT] [v] reports the following:

Out of 12 AVRO ANSON aircraft sent out from PRESTWICH airfield to bomb the SAUSAGE-DEALERS only one returned, and out of 15 of the same
type sent out from MANSTON only three returned. It is not known how
many of the group sent out from LEUCHARS returned. The bomber pilots
consider it a mistake to send these aircraft to bomb the SAUSAGE-
DEALERS.

6. A new two-seater aircraft, the BEAUFORT BOE [vi], is being
tested at the [d] airfield. This fighter has four machine-guns and
cannon. The cannon shells are three inches in length and [1 group
unrecovered][e] inch in diameter. Its speed in a dive is said to be
800 m.p.h. [1 group unrecovered] the production of a new transport
aircraft, the STIRLING, [which has][a] four engines on [2 groups
unrecovered]. All the BUENHEIMS have been removed from his airfield.

7. The SAUSAGE-DEALERS have often bombed his airfield; one or
two aircraft [were used on each occasion][a]. They have destroyed
buildings [1 group unrecovered], workshops and the water tower. The
ground defense is improving. Instead of LEWIS [guns][a] there are
BOFOR guns. There are also 3.7 and 4.5 [inch] [a] A.A. guns. Bombs
were dropped on the [C% munitions] factory in CARDIFF

[14 groups unrecoverable]

[8% across] the river SEVSPN as yet unsuccessful [f].

8. Fighter pilots confirm the Air Minister’s figures of 878
German aircraft shot down between 8th and 20th August, 55 of these
aircraft being accounted for by A.A. fire. The pilots’ morale is high.

Notes: [a] Inserted by translator.
[b] Possibly an error for ODIHAM.
[c] It is not clear whether “he” relates to JÉRÔME or the General.
[d] Presumably THERAPEUTIST’s airfield.
[e] Probably a fraction.

Since this sentence is incomplete the exact rendering is uncertain, and it has therefore been translated literally.

[ii] SASHA: the U.S.A.

[iii] The General: i.e. General DE GAULLE.

[v] THERAPEUTIST: Unidentified covername. See also MOSCOW’s No. 450 of 7th September 1940 (3/PPDT/T20), and LONDON’s Nos. 882 of 14th August 1940 (3/PPDT/T36), 903 of 17th August 1940 (3/PPDT/T37), 990 of 7th September 1940 (3/PPDT/T32) and 1107 of 3rd October 1940 (3/PPDT/T24).

[vi] BEAUFORT BOE: This is probably an error for the BEAUFIGHTER two-seat fighter. The BEAUFORT was a three-seat bomber. The significance of BOE is not understood.

[vii] BARCH: Possibly Simon Davidovich KREMER, whose official post was Secretary to the Soviet Military Attaché in LONDON. He was appointed in 1937 and is thought to have left sometime in 1946. 1. According to information from the METRO [i] the Foreign Office has decided not to rush with the question of the Baltic States since in their opinion a similar situation is coming to a head in Finland. They think that if the latter does occur it will cause great displeasure in SASHA [ii] whose line in this question the British intend to watch.

2. The fact that the SAUSAGE-DEALERS [KOLBASNIKI][iii] are using large groups of aircraft 400-450 strong by day and that they are mainly bombing ports, i.e. the THAMES Estuary, PORTSMOUTH, SOUTHAMPTON, PORTLAND, CARDIFF and SWANSEA, indicates that the SAUSAGE-DEALERS are endeavouring to paralyse the activity of England’s main shipping centers [MORSKIE BAZY]. The authorities do not reveal the results of air-raids but the FRIENDS [DRUZ’Ya][iv] report that the damage is increasing and people are fleeing from the coastal areas.

3. THERAPEUTIST [TERAPEVT][v] reports that this week the SAUSAGE-DEALERS smashed two hangars and destroyed eight aircraft. The aerodrome was back in working order three hours after the raid. There are altogether 150 aircraft on the aerodrome which is guarded by Dutch soldiers. Allegedly five Frenchmen (two officers and three soldiers) have been shot for espionage on his aerodrome.

(cont. overleaf)
4. The Captains of the Estonian steamships bombed by the SAUSAGE-DEALERS speak poorly of its [a] quality. Out of 40 bombs not a single one hit. Two 250-kg bombs went through the deck of the S.S. KATVALDIS without exploding. They say that the SAUSAGE-DEALERS used to be better at bombing.

5. BUSINESSMAN [KOMMERSANT][vi] has reported that last week the SAUSAGE-DEALERS dropped five parachutists in the NEWBURY area. Only two have been captured. The SAUSAGE-DEALER guns located in the BOULOGNE area have started to shell the south-east coast of England. To date the damage is said to be slight. A SAUSAGE-DEALER aircraft flew over the area during the shelling.

6. POULTRY-DEALER [KURNIK][vii] has reported that
has proposed to TOM WINTRINGHAM [viii], a former battalion commander in the International Brigade, that he should help them to organize a Republican group with a view to a rising against FRANCO. TOM was expelled from the CORPORATION [KORPORATsIYa][ix] after his arrival from the south. He is now working in a special school on introducing Spanish methods of anti-tank warfare into the Home Guard [VNUTRENNYaYa OKhRANA].

PRESS REPORTS ABOUT THE LUFTWAFFE AND USE OF GAS IN FRANCE (1940)

From: LONDON
To: MOSCOW
No: 887 15th Aug. 40

To JOHN

The press reports the following Germans.

1. Before the main air-raid small groups of aircraft travelling ahead lay a screen of white smoke. Large groups bomb a few minutes later under cover of the smoke.

2. Single aircraft and small groups have the job of shooting up barrage balloons.

3. Ju-88’s are equipped with an instrument for bringing the aircraft out of a dive and releasing bombs at the same time. The instrument operates on the aneroid principle.

4. After the German airmen from shot-down aircraft get down on the water they release a green smoke cloud which can be seen by an aircraft at a distance of about five miles.

5. The daytime raids by the dive-bombers are allegedly mounted in most cases at a height of 2,500-3,000 metres. They peel off from this height down to 1,500 metres and go into a dive.

6. The German Commandaturas used small amounts of colourless and odourless gas on the MAGINOT LINE and at LIÈGE. A medical man who has been treating the soldiers suggests that this gas was of the arsine type [MYShYKKOVO-VODORODNOGO SOSTAVA].

1. A week of heavy air-raids has made little difference to the situation. A report from the FRIENDS [DRUZxYa][i] indicates that civilian morale is relatively high. BEAVERBROOK [ii] stated to the MASTER of the METRO [KhOZYaIN METRO][iii] that in the period 14th–16th August 72 SPITFIRES were lost and in the same period 75 were received from the factories. 32 HURRICANES were lost and 50 received, together with 12 DEFIANTS, i.e. production is covering losses. He considers that the Me-109 is more manoeuvrable than the Me-110. Apparently the British are not about to introduce fighters with cannons because of the low rate of fire. THERAPEUTIST [TERAPEVT][iv] however, has reported that on his aerodrome a fighter [a] with 12 machine-guns and another [a] with cannons are being tried out. BEAVERBROOK stated that the SAUSAGE-DEALERS [KOLBASNKI][v] would continue bombing for another one or two weeks, but would then cease in their attempt and would possibly reinforce Africa.

2. The aircraft factory in ROCHESTER has been destroyed. There is serious damage to the ports of SOUTHAMPTON and TILBURY. Part of the administrative wing [SLUZheBNOE POMEShchENIE] and one hangar on CROYDON Aerodrome have been destroyed but the aerodrome [B% keeps going].

1. On 18th August I was in MORDEN in south-east LONDON. The SAUSAGE-DEALERS [KOLBASNIKI][ii] bombed during daylight the[8/16]th August the factories located there. The police do not permit entry into this area. Some houses near the factories have been badly smashed. On 18th August the SAUSAGE-DEALERS [KOLBASNIKI][ii] bombed KENLEY Aerodrome. I was there today. I could not get onto the aerodrome since all the roads are closed and guarded by soldiers. Soldiers and machine-gun nests are dispersed round the aerodrome in bushes and trenches [iii]. Fuel tanks are concealed in bushes. Near the aerodrome there are bombed-out houses. A squadron of HURRICANES patrols in formation above the aerodrome the whole time in flights of three aircraft. Passers-by have their papers checked. There was no panic among the population during an alert.

No. 233 DICK [DIK][iv]
1. I have looked round the MERTON area (in south-west LONDON). Bombs have fallen in the working-class quarter, demolishing as many as 10 streets. MORDEN HALT Station and one factory have been demolished. More than 60 people have been killed. The bombs ranged from five to 50 kg. It turned out that the area had few technical resources. One bomb dropped on [B% 16th] August did not explode until 18th August. The bulk of the bombs fell 100-500 metres north-west of a large group of factories without causing any damage to the latter. The raid had poor results because the run-in to the target was incorrect. The SAUSAGE-DEALERS [KOLBASNIKI]I] bombed from south to north: the strip of factories runs for more than three kilometers from east to west and is 500 metres wide. The captain of a Baltic States steamship, by the way, also reports that the SAUSAGE-DEALERS bombed across their convoy. An analysis of where the bombs fell in CROYDON confirms that some of them are late in dropping their bombs. Over 100 people were killed in CROYDON because the population received no warning. The raid was apparently a surprise to the military authorities.

2. I also saw signs of bombing at one factory in SURRITON (south-west of LONDON) and of dwellings in STAINES. At a large aerodrome on the western outskirts of ANDOVER one hangar has been demolished and one hangar pierced by an unexploded bomb. There were up to 30 BLENHEIM bombers and up to 40 fighters on the aerodrome.

3. A new group of barrage balloons has been established in the area between STAINES and UXBRIDGE, apparently in order to provide additional protection to LONDON from the west. Altogether there are 20 of them.

To the DIRECTOR.

1. The 20 mile zone forming a belt along the south-eastern coast of ENGLAND is one continuous military camp. It is forbidden to go there. According to the Press, 60 to 75% of the population has left this region. The main bulk of the A.A. artillery is in this region. The [B% whole] zone is divided into army, corps and divisional areas. It should be reckoned that the entire fighting strength[a] of the British Army, approximately [C% 1,300,000]/men, is concentrated here, as, during my two day tour of all the military camps in the ALDERSHOT, SALISBURY, TIDWORTH, BULFORD district, I only came across units which had recently been called up and not a single tank. As regards tanks, I think that the British have transferred them to the war zone[c] and that as yet they have few of them.

2. Along the southern slopes of the hills north of the REIGATE-DORKING-GUILDFORx railway line, trenches are being dug and also, in places, anti-tank ditches. The ALDERSHOT district is being particularly well fortified. At either end of the bridges 1.5-metre concrete pillars have been placed, with corresponding slots into which iron bars are inserted in order to block the roads. In the water on either side of the bridges, piles or vertical obstacles consisting of lengths of rail, have been fixed. At all corners and cross-roads on the REIGATE-ALDERSHOT road block-houses have been erected. Presumably the British are constructing their second line of defence along the above line. This line of defence is not yet complete: its depth has not yet been determined. There is no A.A. artillery to be seen on the second line and, from my observation, it is only to be found in the coastal zone and around LONDON. Incidentally, at the beginning of the war batteries of 3.7-inch and 4.5-inch A.A. guns were sited in all LONDON parks and squares, but few of them are left now.
[1 group unrecovered] fighter aircraft have the following zones of activity:

LONDON (the Metropolitan area) is excluded;
The territory between LONDON and the beginning of the war zone is included;
The war zone is excluded;
The English Channel is included.

This would explain the fact that on 19th August over LONDON itself a British fighter was shot down by A.A. fire.

1. On 13th August the first German shells (presumably 12-14 inch caliber) fell on the south-east coast of England. On 22nd August the SAUSAGE-DEALERS KOLBASNIKI[1] shelled from the CAP GRIS NEZ area a convoy of ships [1 group unidentified] to [a] DOVER. The firing started at 10.56 and ended at 12.15. Artillery spotting was by an aircraft and smoke shells. The range was 32-37 km. More than 100 shells were fired. A salvo [consisted of][b] four rounds with an [D% average]interval between salvoes of two minutes; the interval between firing and the fall of the shells was about one minute. The British laid a smoke screen and state that there were no losses. At 2100 hours on 22nd August the SAUSAGE-DEALERS fired 12 shells at DOVER in salvoes of three shells. The British bombed by [the light of][b] parachute flares [c].

2. It is thought here that the admiral and two generals who have arrived from SAShA [ii] will work in contact with the appropriate naval [d] staff. This is possible, bearing in mind that SAShA has 12 military diplomats here for general observation [duties][b].

To DIRECTOR.

1.[a] Last night the British met the SAUSAGE-DEALERS [KOLBASNIKI][i] with gunfire only. Additional guns were concentrated for this purpose. Old but improved three-inch guns were noted at a number of new points. The firing was particularly heavy in the direction of the aircraft noise. Searchlights were not used. During the night the SAUSAGE-DEALERS dropped their bombs at random, since the military objectives under our observation did not suffer. Two SAUSAGE-DEALERS were shot down. [1 group unidentified] that since 7th September the SAUSAGE-DEALERS have been bombing LONDON and have hardly been bombing other industrial centers at all. 1. The MASTER of the METRO [Khozyain Metro] has told me that last week the British again secretly received SAUSAGE-DEALER peace conditions:
   A. Poland [2 groups garbled] DANZIG corridor.
   B. Autonomy of Czechoslovakia.

The SAUSAGE-DEALERS are to get the Colonies.

   Apparently CHURCHILL gave a definite refusal. His Parliamentary Secretary told the MASTER of the METRO that it was hoped that SAShA would enter the war in December. This would mean the acquisition of SAShA’s fleet, arms and money and would have a tremendous effect of morale. It was unimportant that SAShA’s army would not be ready in 1941. It was important to obtain arms for their two million strong army which was short of tanks, guns and machine-guns. Of the [1 group unidentified] rifles received from SAShA, by the way, 50 percent have proved unfit to use. The 14-ton cruiser tank is the main one in production, but difficulties are being met in manufacturing the necessary armour for it. The aircraft industry is working very successfully; apparently output is approaching 2,200 aircraft a month, 75 percent of them being fighters. The MASTER thinks that the basic [B% aim] of the British is to sit it out until the spring and then prepare for operations against Italy, whilst keeping up the blockade and the war in the air against the SAUSAGE-DEALERS.

2. Last night the SAUSAGE-DEALERS bombed LONDON, two or three aircraft being in the air at a time. For six hours not more than 12 aircraft in all

(cont. overleaf)
flew over LONDON. Despite the [B% activity] of over 80 searchlights and the A.A. guns not one of them was shot down. Not a single British fighter was observed during the night.

3. The press reports that the first line of observation and communications is a warship stationed far out at sea. The second line is a flotilla of fishing vessels, the largest out at sea and the small ones inshore. These are connected with the shore and among themselves by radio. The third line is observation [C% posts] on land.

1. The deputy to the MASTER of the METRO [KhOZYaIN METRO] has been speaking to a retired naval officer [by the name of] YOUNG. He works as naval correspondent of the MANCHESTER GUARDIAN, is a close friend of CRIPPS and was expelled from the Labour Party [ROBOchAYa PARTIYa] at the same time as the latter. He stated that in the diplomatic sphere Britain was not using her strength against Italy. The Foreign Secretary [MINISTR INOSTRANNYKh DEL] was continuing to work actively on anti-fascist [B% leanings], chiefly in the Balkans. He considers that this country is gradually moving towards a Fascist régime. CHURCHILL and BEVIN are probably the leaders of this movement.

2. According to MINISTER’s and CARPENTER’s information the following targets were bombed in LONDON from 23rd to 26th August. [1 group unidentified] ships in the TIDAL BASIN DOCK. Result fire. War factory in EAST ACTON. In the STEPNEY area a number of bombs fell [which penetrated] to a depth of 2-15 feet and did not explode straight-away. The police immediately evacuated the inhabitants. During the day several bombs exploded destroying a number of houses. After two days the police are giving permission to return home. In the MOORGATE area 50-kg bombs destroyed a number of warehouses. A warehouse containing wax was burnt down.

3. As regards LONDON the aim of the SAUSAGE-DEALERS [KOLBASNiki] is to bomb the industrial suburbs by day, and at night to keep the city
itself and the air defence [PVO] in a constant state of tension by individual raids. At the same time lone [aircraft][a] dropped bombs on the city at the end of their flight.

4. Reports show that the SAUSAGE-DEALERS have been particularly active in bombing ports and aerodromes. PORTSMOUTH, PORTLAND, SOUTHAMPTON, DOVER and HILL [GUL'] have suffered severely. The naval correspondent [vii] reported that the north-east region of England was almost defenceless since the authorities had taken away the A.A. guns to protect the western ports, where most of the activity was concentrated. He stresses the lack of A.A. guns.

5. On 24th August 15 bombs were dropped on FORD Aerodrome destroying the administrative wing [SLUZhEBNOE POMEShchENIE] and [C% fuel] dump. On TANGMERE Aerodrome two vehicles were destroyed, and after the raid 15 ambulances took the casualties away. On 25th August HENDON and BIGGIN HILL Aerodromes were bombed; days that over 100 SAUSAGE-DEALER aircraft flew towards the latter at the same time. They were met by 30 fighters near the aerodrome.

6. The press confirms that on 26th August the SAUSAGE-DEALERS dropped bombs filled with heavy oil with a mechanism to ignite them. The SAUSAGE-DEALERS have also dropped new incendiary bombs made of thin metal and filled with paraffin wax and resin [b].

7. According to information from local Frenchmen [c] the SAUSAGE-DEALERS are firing on DOVER with the French heavy 340 and 380 mm guns that were on railway mountings at positions behind the MAGINOT LINE. During the break-through the French brought them up to the River AISNE but even so they were not used. On 24th August the SAUSAGE-DEALERS shelled DOVER from various positions between CALAIS and BOULOGNE. At night British aircraft bombed their positions at HARINGZELLES from a height of 4,000-10,000 feet.

2. During a flight by British bombers over the ALPS to attack Italy ice formed on the wings of the aircraft, forcing one aircraft to turn back.

3. The press reports that from 8th to 28th August 890 SAUSAGE-DEALER aircraft were shot down over Britain (104 of them by A.A. guns). The British lost 219 [aircraft][a] and 94 [b] of the pilots survived. The figure does not include the British losses outside the United Kingdom [METROPOLIYa] or in action over Germany or Italy.

4. The press reports that new BFAA machine-guns have gone into production. First type - 7.92 mm, rate of fire 3,000 rounds in 30 minutes without changing the barrel and 7,000 rounds in 30 minutes using two barrels. Second type - calibre 15 mm, 800 rounds fired in 8-10 minutes using two barrels.

2. MINISTER [MINISTR][i] has reported that at 3.15 on 27th August the SAUSAGE-DEALERS [KOLBASNIKI][ii] bombed the HAWKER Aircraft Factory in KINGSTON from a height of 500 metres. Bombs fell close by but the factory did not suffer. On the night of 28th August the SAUSAGE-DEALERS dropped bombs on dwellings in NEASDEN west of the railway works. On the night of 29th August the SAUSAGE-DEALERS repeatedly (four aircraft at a time) bombed in the HAMPSTEAD GARDEN SUBURB area. Some dwellings were demolished and 10 people were killed. Five people have been arrested at the SMITH [SMIT] factory; some of them had been making light signals during the night bombing of the factory. One person at the HANDLEY-PAGE works has been arrested for making signals.

3. CARPENTER [PLOTNIK][iii] has reported that on 26th August the grain silos at MILLWALL DOCK were burning as a result of the bombing. On 29th and 31st August the SAUSAGE-DEALERS dropped a large number of small bombs in the STEPNEY area. Dwellings were demolished. On the night of 28th August some bombs were dropped in the LOTTLER WORMWOOD SCRUBS area near the gasworks.
4. The press reports that the success in the night bombing of Germany can be attributed to the fact that the British have been bombing the same allotted targets for months and the pilots have studied the targets well. Usually a few minutes before an attack one aircraft has set fire to the target and then bombing of the target by a wave of bombers has followed.

I understood that although he has a post he will nevertheless for the time being be active only in the plan of establishing a factory. He hopes that the British will bring him into [B% organising] the supply of the Allied troops in the French colonies. He handed to us data and drawings of the HISPANO-SUIZA type 404 cannon. The material was taken from [b] in the French Ministry for Air and is dated 1939. State urgently whether this material is of interest to you. From a conversation with MARTHA [MARTA][iii] I understood that JÉRÔME considers that we are not paying him much (£50 for both). It would appear that high prices and the need to maintain a flat are involving them in a lot of expense. I told her that we should help but [the amount of][c] intelligence must be increased.

3. PRESS REPORT ON NEW GERMAN BOMB

(1940)

From: LONDON
To: MOSCOW
No. 990 7th Sept. 40

To DIRECTOR.

1. The focus of the bombing continues to be South-East England and the BIRMINGHAM, CARDIFF and LONDON areas. [1 group unidentified] that latterly the British fighters after [1 group unidentified] return to aerodromes to the north and north-east of LONDON, and not to the south-east as formerly. The great bulk of the bombs in LONDON have been dropped 300 metres off target: this is a result of the high ceiling. I personally have not seen the SAUSAGE-DEALERS [KOLBASNIKI][i] lower than 5,000-6,000 metres nor more than 3-7 aircraft at one time in daylight. Last night the SAUSAGE-DEALERS used rockets to bomb LONDON - the light lasted for five minutes. [B% Observation has established that] most of the A.A. guns are deployed along the south-east coast, with a second group forming an outer and an inner ring round LONDON. In addition there are separate groups of A.A. guns for the air defence of individual targets. The low percentage of SAUSAGE-DEALER losses due to A.A. guns (114) can be explained primarily by the high ceiling. The military authorities persist in saying that a SAUSAGE-DEALER invasion is possible in the next one or two weeks.

2. THERAPEUTIST [TERAPEVT][ii] has reported that on 1st September the SAUSAGE-DEALERS bombed SWANSEA. [B% Some petroleum storage tanks] and the refinery belonging to SHELL-MEX were destroyed. The bombing [B% continued] throughout the night, more than 500 people were killed and there were many injured. From his aerodrome alone 250 stretchers were sent there. He stated that when he visited a sound-ranging post the soldiers told him that the SAUSAGE-DEALERS find their way to BIRMINGHAM and other Midland towns by means of a directional radio beam originating in France. His aerodrome has (cont. overleaf
been bombed again: the hospital was smashed and 30 people were killed. All the craters on the flying field are covered with camouflage nets so that the SAUSAGE-DEALERS cannot determine the real extent of the damage. On 4th September the SAUSAGE-DEALERS bombed the VICKERS works at WHEYBRIDGE. Bombs fall on the factory’s [B% canteen] killing 80 people. The factory is not seriously damaged and work was interrupted for one day. On 1st September the SAUSAGE-DEALERS bombed the VAUXHALL automobile works in LUTON. There were many casualties. 2,000 workers were idle until 5th September.

3. The press reports that the SAUSAGE-DEALERS are using H.E. bombs with concrete casings against ships. Their effectiveness has not yet been established since there has not been a case of a direct hit yet.

No. 998 11th Sept. 40

BAUER [BAUER][i] has reported [the following:][a]

1. Out of the Czech contingent a brigade totalling 3,000 men is being formed comprising two infantry battalions, two batteries of 75 mm guns, one company of engineers, one anti-tank company and a reserve group. The brigade commander is General MIROSLAV [ii]; in the past his surname was NAJMAN [iii]. All the senior officers are alleged to have changed their surnames now. The 75 mm [guns][a] were received from the British who are arming themselves with them because they have been [B% received] from SAShA [iv] on an old French order. The Secretary for Foreign Affairs RIPKA recently made a speech to the officers. In answer to a question he stated that the U.S.S.R. had been unable to help Czechoslovakia at the appropriate time because of the latter’s lack of preparedness for war. BAUER indicates that the junior officers are well-inclined towards the U.S.S.R. [1 group missed] fascist tendencies are predominant among the higher officers. He says that, after meeting the British, other officers whom he knows have formed a good impression of the British Army. He considers that they have mobilized [2 groups garbled] [B% 500,000 men]. GERMAN BOMBING (1940)

From: LONDON

To: MOSCOW

No. 999 10th Sept. 40

To DIRECTOR.

1. For the present the SAUSAGE-DEALERS [KOLBASNIKI] cannot repeat a daylight break-through to LONDON like that of 6th September. They are now increasing their night bombing. First one aircraft sets fire to the objective; a little later they bomb in large groups. They bomb from a great height and the hits are insignificant. Most of the buildings blitzed in LONDON are dwellings and shops. Delayed-action bombs are often used. The British admit that the attempt to use their aircraft as night fighters has produced no positive results. The searchlights' ceiling is limited and they are of little help to the A.A. guns. Two weeks ago I saw that one searchlight in 30 that were operating was twice as powerful as the usual ones.

2. The SAUSAGE-DEALERS' bombing these days is focussed on docks, railway stations, power stations, bridges and gas [sic]. They have scored a good many hits on the first, but according to information from the FRIENDS [DRUZ'Ya] the docks east of the BLACKWALL TUNNEL are intact. In the [ROYAL] VICTORIA DOCK, however, a 10,000-ton ship was blitzed. A number of gasworks have been demolished, so houses in LONDON are receiving half [B% pressure]. 250-kg bombs were dropped on BAKER STREET Station, causing great damage, but the station is working. PADDINGTON Station has been bombed three times and

To DIRECTOR.

1. The report that railway lines and the Underground where it runs in the open are being used by the British for [siting][a] A.A. guns has been confirmed. The use of mobile A.A. guns in the region of WESTBOURNE PARK, LAD BROKE GROVE and ST. QUINTIN PARK stations is a known fact.

2. In LIVERPOOL [i] I saw a number of bombed-out warehouses on the waterfront. While passing through the Midlands from LIVERPOOL to LONDON I saw only slight damage here and there. On the rail journey from LONDON to LIVERPOOL I established [the following][a]: the train runs two or three hours late. Passenger trains are held up to let goods trains through and are without lighting during air-raids.

3. [B% We] have looked round NORTHOLT, HENDON, HESTON and FERRY Aerodromes: HESTON is the only one where hangars have been demolished. The SAUSAGE-DEALERS [KOLBASNIKI][ii] have tried to bomb NORTHOLT Aerodrome but have missed - the road and nearby houses have been demolished. Near this aerodrome the British have erected about [B% 10 buildings] - hangars made of tubing and painted bright red. I assume that this is for camouflage. They are all empty. [I group unidentified] that a bomb fell close to these hangars.

4. In the PARK ROYAL area several blitzed factories can be seen. In the northern part of the HENDON area an electric tool factory has been blitzed. The SAUSAGE-DEALERS have bombed the railway junction in the
CRICKLEWOOD area and also the HANDLEY-PAGE Aircraft Factory, but the latter is working normally - the nearby houses have suffered. Warehouses in HARROW ROAD near PADDINGTON Station have been damaged. On the night of 5th-6th October there was heavy bombing in the BRENTFORD and CHISWICK industrial area. Many dwellings were demolished. The area is closed to through traffic. The goods depot in the MARYLEBONE area has been damaged.

5. It is confirmed that despite great height, thick cloud, darkness and heavy gunfire the SAUSAGE-DEALERS can pick out with exceptional accuracy the important areas to be bombed, but in the majority of cases the bombs fall 20-200 metres away from the target.

6. In reply to your telegram No. 6302 [b] I repeat [c] "POULTRY-DEALER [KURNIK][iii] reports that because of the continuous bombing the Headquarters of Eastern Command [ShTAB VOSTOCHNOGO VOENNOGO OKRUGA], which was in HOUNSLOW, has moved to ASHFORD and part to EALING".

To JOHN [DZhON][i].

1. I was in the CITY yesterday. A large number of roads are closed [1]group garbled fires continue [to burn][a]. There are many blitzed houses in CITY ROAD, OLD STREET AND HOLBORN. Bombs have demolished houses next to the Air Ministry. Traffic and the Underground have been partly disrupted.

2. In the evenings I have seen many people standing around good shelters waiting for them to be opened, since they are opened only if there is an alert. Now the people quickly take refuge in a shelter, which was not the case previously.

3. I was on NORTHOLT Aerodrome during an alert; fighters are located there (as I reported earlier [ii]). After the alert a squadron of HURRICANES took about 15 minutes to take off and form up, after which they flew off to LONDON in open formation. About three or four squadrons remained on [b]. The pilots sat in and beside their aircraft – the engines were not running.

4. The British FRIENDS [DRUZIYa][iii] have reported that warships with A.A. guns have been stationed in the THAMES near the docks, which has not happened before. They have also reported that during a visit by CHURCHILL to the EAST END (which has suffered badly from the SAUSAGE-DEALERS’ [KOLBASNIKI][iv] bombing) the person in charge [1 group unidentified] suggested to the latter that he should drive off quickly because of the throng of workers [1 group garbled] to take the law into their own hands with CHURCHILL.

1. In LONDON the CITY and the districts adjacent to railway stations have suffered particularly from the bombing. There is not a single main road on which one can drive straight through. There have been hits on VICTORIA and EUSTON Stations but they are working. There is a noticeable attempt to destroy telephone exchanges. Bombs have fallen on the telephone exchange in HOWLAND STREET. Business life is now suffering seriously, chiefly from delayed-action bombs, since whole districts have been evacuated and it is difficult to move about town. I think most of the heavy damage in LONDON is not to military targets but to civilian property. Usually they take three or four air-raids to destroy military targets.

[62 groups missed].

Because the delayed-action bombs have generally been 10-50 kg ones I doubt the press report that the one-ton bomb which lay for three days at a depth of nine metres in the CITY was a delayed-action one. It is relatively quiet here during the day and worst at night. The noise of the A.A. guns and the bombs makes it impossible to work. The general state of tension and the bombing among [1 group unidentified] is increasing. The number of homeless and casualties is growing. In the evening the people, spontaneously and without the authorities’ permission, move into the Underground and every imaginable tunnel to spend the night. The numerous above-ground shelters are used only haphazardly by people sheltering from the rain of A.A. shrapnel which makes it dangerous to move about town.

The main strike from Norway where the coast is suited to concentration in secret. Occupation of the SHETLAND Isles, Iceland and Ireland. He considers that the SAUSAGE-DEALERS have adequate naval forces for this operation since the British have left only six battleships here and have thrown all the rest into the Mediterranean.

1. Our Trade Representative was in SOUTHAMPTON on 20th September and has reported what he saw on the way there.

A. The VICKERS Aircraft Factory at WYBRIDGE was bombed by the SAUSAGE-DEALERS [KOLBASNIKI] - about two workshops were destroyed. Before the bombing the cable of the air-raid siren [PROVOD SIGNALA TREVOGI] was cut and the alert was not sounded. About 70 were killed and 100 injured. BROOKLANDS Aerodrome alongside was intact and there were a large number of fighters on it.

B. 13 tanks of different types at FARNBOROUGH and BASINGSTOKE. FARNBOROUGH Aerodrome was intact and there were many fighters on it.

C. There were a large number of SPITFIRES on EASTLEIGH Aerodrome. The aerodrome and a number of factories were intact but there had been bombing nearby.

D. In the center of SOUTHAMPTON there was hardly any bombing. The port was seriously damaged. The docks on the River TEST were completely demolished. The INNER, OUTER and OCEAN Docks suffered considerably. The refrigerated warehouses were burnt down. The majority of the cranes
were destroyed. The EMPRESS DOCK was hardly damaged. Military transports, M.T.B.'s, trawlers and one destroyer were lying in them. [2 groups missed] damaged ships were berthed in the different docks. The power station was [C% intact] [180 groups missed]

Stove[Blike]-like devices standing a metre apart for a distance of several kilometers. By each there was a pot containing a special compound. This device is presumably for [laying][a] a smoke screen during the SAUSAGE-DEALERS' bombing. The personnel operating this device were soldiers.

To DIRECTOR.

1. JEROME [ZhEROM][i] has reported that General DE GAULLE and his troops are in SIERRA LEONE to attack DAKAR from the landward side.

2. General FULLER [ii] writes that the SAUSAGE-DEALERS [KOLBASNIIK][iii] could launch an army of five mechanized divisions against Britain. Each division has in all 360 tanks, 960 motor vehicles and 250 motorcycles. 1,300-1,500 barges would be required to transport this army. He points out that against a weak Poland the SAUSAGE-DEALERS launched 37 infantry divisions, five motorized, five armoured and four light mechanized divisions, with one cavalry brigade and one tank regiment per corps. He is doubtful whether it is possible for the SAUSAGE-DEALERS to carry out a serious invasion. People are becoming increasingly doubtful here whether the SAUSAGE-DEALERS will invade. Some people cannot understand why, since 10th September, the SAUSAGE-DEALERS have been using relatively small forces to bomb Britain and the night raids have been by one, two or three aircraft. Some of the British consider that the SAUSAGE-DEALERS are shunning the risk of losing large groups of aircraft because of the growth of the Soviet Air Force [AVIATsIYa], whilst others think that the war may switch to the Middle East.

3. According to information from a [B% correspondent][iv] 50 percent of all the damage in the LONDON docks resulted from the bombing of 7th September. Some chemical works and a petroleum

refinery in XXXXXXXXXX were destroyed. Some factories in GREENWICH and CHARLTON [ChAL’TON] were damaged. The gasworks in BECTON and STEPNEY were damaged. Bombs were dropped on KINGS CROSS, WILLESDEN JUNCTION, CLAPHAM JUNCTION and WIMBLEDON railway stations but traffic was not interrupted. Some warehouses in CITY ROAD were burnt down. A magnetic bomb is said to have been dropped in the TOTTENHAM area, damaging hundreds of houses.

2. GERMAN BOMBING OF LONDON

(1940)

From: LONDON

No. 1069 26th Sept. 40

To DIRECTOR.

1. BEAVERBROOK [i] told the MASTER of the METRO [KhOZYain METRO][ii] that they were working on night air defence [PVO] with the aim of enabling fighter pilots see in the dark. He said that the position was good in regard to the matériel; they had reserves and from October onwards would be receiving 750 aircraft from SASHA [iii]. They apparently have as many bombers [1 group garbled] the SAUSAGE-DEALERS [KOLBASNIKI][iv]. From November onwards they would begin to get Canadian pilots. On 20th September 119 British aircraft of three types bombed BERLIN. Apparently a few days ago the British once again secretly received peace [B% conditions] from the Germans. He says they are not bad. The basic [B% condition] is that the British are not to interfere in the affairs of the continent of Europe.

2. On 25th of September I was in the western suburbs of LONDON. There has been slight bomb damage to the FIRESTONE [FAIRSTONE] Tyre Factory and the PACKARD automobile workshops in the GREAT WEST ROAD industrial area. One workshop has been damaged in the large SLOUGH complex of factories. At the same time the SAUSAGE-DEALERS are continuing...
to bomb housing and railway junctions in LONDON. As night falls the British increase the number of balloon barrages. About 150 can be seen from the METRO [v], which means that there are not less than 600 in town. Their height is not more than 1,500–2,000 metres. A British-made mine weighing 1,300 kg and three metres long was dropped in TOOTING. [1 group unidentified] naval ratings sent from PORTSMOUTH rendered it safe.

No. 1099 2nd Oct. 40

To DIRECTOR.

1. ATTLEE [i] and GREENWOOD [ii], two members of the War Cabinet, have been to the METRO [iii] and stated to the MASTER [KhOZYaIN][iv] that the danger of invasion was not past but the possibility was growing less every day. The Government intended to follow SASHA’s [v] example in supporting China financially in the hope that the latter would use the money to buy armaments in the U.S.S.R. An intensification of German and Italian activity in the Middle East was expected.

2. INTELLIGENTSIA [INTELLIGENTsIYa][vi] has reported that the X GROUP [GRUPPA IKS][vii] has reported to him that a girl working in a government establishment noticed in one document that the British had broken [RASKRYLI] some Soviet code or other and apparently she noticed in a/the document [a] the following [words:][b] “Soviet Embassy in Germany”. I stated that this was a matter of exceptional importance and he should put to the group the question of developing this report [further][b].

3. The SAUSAGE-DEALERS’ [KOLBASNIKI][viii] night bombing is having a bad effect throughout the country. Trains are running slowly and late. Loading and unloading are slowed down because of the black-out. Some lines [1 group unidentified] do not work for one or two days after a raid. Goods have been sent by canal. The trains are overflowing with refugees from LONDON and other bombed centres.

4. [1 group unidentified][c] the SAUSAGE-DEALERS have now mostly been bombing LONDON and LIVERPOOL. In the period 28th-29th September some of the hangars on HESTON Aerodrome, the PHILIPS Map Works on the corner of WESTERN AVENUE and VICTORIA ROAD, the BOWDEN factory located at WILLESDEN JUNCTION,
which makes components for aircraft and ships, and an aero-engine factory in SOUTHAMPTON were heavily damaged. The BRUNSWICK DOCK in LIVERPOOL was destroyed. Following a raid 7,000 workers at the SIEMENS electrical instruments factory at WOOLWICH are idle. The SAUSAGE-DEALERS are continuing to bomb the railway stations at junctions in LONDON.

5. Latterly the SAUSAGE-DEALERS' heavy bombs have shown that one of the government types of above-ground shelter is any good. At night the Underground is overflowing with people, notwithstanding the instructions of the authorities. An epidemic is possible because of the start of the cold weather and the unhygienic conditions. The Government’s plan is to reduce the population of LONDON to five million. Use of the Underground and other places can provide quarters for 500,000 people. It is difficult to understand the Government’s statement [4 groups garbled][d] No. 290?

1. The MASTER of the METRO [KhOZYaIN METRO][i] [has said][a] that the Balkan diplomats here are disquieted by the German activity in the Balkans, [C% linking] this with the fact that the invasion is held up. The Greek Ambassador told him that Germany is said already to have an understanding with Roumania and Bulgaria on the passage of troops through to the Turkish frontier. The Czechs report the concentration in the KRAKÓW area of 36 SAUSAGE-DEALER [KOLBASNIKI][ii] divisions for a Balkan operation. BUTLER[iii] yesterday suggested to the MASTER that talks should be started on the Chinese question and asked if the U.S.S.R. wished to take part in the talks between Britain and SAShA [iv] about the Pacific Ocean.

2. POULTRY-DEALER [KURNIK][v] has reported that because of the bombing of Eastern Command Headquarters [ShTAB OKRUGA VOSTOChNOGO] which was in HOUNSLOW, part has gone to ASHFORD and part to CLING[vi]. Some steamships have brought into HULL from SAShA 70-80 small river-type vessels. It is thought that these vessels are for use against the SAUSAGE-DEALERS' barges if there is an invasion. Last week about 80 SAUSAGE-DEALER aircraft made a sudden air-raid on the BRISTOL Aircraft Factory. About 200 bombs were dropped, slightly damaging two workshops and killing 123 people who were in an above-ground shelter at the factory. The workpeople will not go into these shelters now.

3. Herewith press information on the new FOCKE-WULF FW 187 ZERSTOVER [b]

two-seater fighters. Two DAIMLER-BENZ 601A 1,105 h.p. engines. Maximum speed 520 k.p.h. Service ceiling 11,800 metres. Rate of climb 2,000 metres in 1.9 minutes and 6,000 metres in 5.8 minutes. Armament four machine-guns (two on each side of the fuselage) and two cannons apparently firing through the engine shaft.

4. According to available information there is a red line with 40, 50, 60 and 70 degree divisions on the side of the cockpit of the Ju-87. The fighter pilots know the angle of dive from where this line coincides with the horizon.

5. In the CANTERBURY area last week A.A. guns shot down a four-engined SAUSAGE-DEALER bomber which was accompanied by 28 fighters. An aircraft of this type sometime or other made a non-stop flight to South America. [It has][a] a crew of 22 and carries five tons of bombs.

6. It has been established by observation that the British have set up at various points on LONDON's inner air defence perimeter single guns whose calibre is apparently not less than six inches. The guns are in places closed to access and are camouflaged. The guns open fire only when the 3.7-inch battery alongside is firing. Usually after one or two rounds from this gun the SAUSAGE-DEALERS immediately get out of its field of fire [SFEra DEJStVIta].

1. In recent nights the SAUSAGE-DEALERS [KOLBASNIKI][i] have been stepping up the bombing of LONDON, whilst the gunfire has fallen off slightly. The SOUTH HAMPSTEAD railway junction has been damaged [and][a] traffic [1 group unidentified] . Admiral EVANS [ii], who is in charge of the shelters in LONDON, stated to the MASTER [KhOZYaIN][iii] of the METRO [iv] that a one-ton bomb dropped there had made a crater 21 metres deep. A 250-kg bomb dropped last night in the HATTON GARDEN area destroyed a chemical works and badly damaged our trade delegation [building][a]. Information on a map captured from the SAUSAGE-DEALERS reveals that LONDON is divided up into small squares and each has a numbered target in a definite [C% category]. The SAUSAGE-DEALERS are over LONDON throughout the night, one aircraft at a time on each flight path.

2. According to the FRIENDS’ [DRUZ’Ya][v] information the SHORT aircraft factory in ROCHESTER has been completely destroyed and 5,000 workers are being transferred to SWINDON, where new production of [1 group garbled] and transport aircraft will be developed on the basis of the PHILLIPS aircraft factory where trainer aircraft were produced previously.

3. INTELLIGENTSIA [INTELLIGENTSYa][vi] confirms that the British really do render delayed-action bombs safe by freezing [b] the bombs’ exploder mechanism.

To DIRECTOR.

[1.][a] In the area that we can see we observed the following method of attack by the SAUSAGE-DEALERS [KOLBASNIKI][i]: first of all they dropped six flash bombs [OSVETITEL’NAYa BOMBA][b]; after they had fallen a considerable part of KENSINGTON was [B% dotted] for a time with a large number of small fires [SVETOVYE TOCHKI][c] which were extinguished with sand. As they fell the flash bombs were fired at and machine-gunned with tracer bullets. One was shot down. The first aircraft after the alert flew lower than usual, obviously so as to be able to aim as it dropped its flash bombs. A few minutes after [the start of][a] the raid the SAUSAGE-DEALERS’ flash bombs had established a seat of fire in werxxx planes xxxxxxxxxxxxxwards throughout the night they dropped bombs in various parts of the city while flying at a height of about 4,000–6,000 metres. Explosions of special bombs that produce a strong light for 5–6 seconds were observed for the first time. From observations of the gunfire it can be concluded that the SAUSAGE-DEALERS come into LONDON from the east, south-east and south. No more than three series of explosions [at a time][a] were observed. Despite the moonlit, cloudless night British fighter aircraft did not take part in the defence.

2. INTELLIGENTSIA [INTELLIGENTsIYa][ii] has reported [the following][a] as a result of a conversation with an officer of the Air Ministry:

The shortage of trained night navigators is confirmed by the fact that the SAUSAGE-DEALERS have not used strong forces of aircraft in night air-raids on Britain. He stated that the British pilots who fly by night over Germany have an extra four months’ training in addition to the usual six months’ training. Apparently when there has been no [anti-aircraft][a] fire the SAUSAGE-DEALERS have been bombing from a height of up to 5,000
metres and at a speed of 290 kph, and from 6,000-7,000 metres at a speed of 400 kph when there has been no firing. He considers that the SAUSAGE-DEALERS proceed towards the target along a radio beam.

1. NOBILITY [ZNAT'] has reported the following information on the SAUSAGE-DEALERS [KOLBASNIKI] air-raid on FILTON 10 days ago. 30 SAUSAGE-DEALER bombers and 30 fighters used a radio beam [iii] to fly from Northern France; they passed over PORTLAND straight for BRISTOL from where they turned on to the FILTON Aircraft Factory. All the bombs were dropped in a ring of smoke laid above the factory by one of the SAUSAGE-DEALERS. Three shelters were destroyed by a direct hit, killing 81 people and injuring 300-500. The damage to production was slight. British fighters appeared after the raid.

2. The FRIENDS [DRUZ'Ya] have reported that all Australian units are gradually being sent from the United Kingdom [METROPOLIYa] to Palestine. Some British units stationed in Northern Ireland are also being sent to Palestine. As a result of the bombing WOOLWICH ARSENAL is working six hours out of the twenty-four. Part of the ARSENAL is being moved to WORCESTER. Last week the SAUSAGE-DEALERS dropped [B% 250] incendiary bombs on FORD Aerodrome, 4 km from ARUNDEL, where British bombers are also stationed now.

1. BARCh [i] had a meeting today with one of [the members of][a] the X GROUP [GRUPPA IKS][ii]. This was an artillery colonel [iii] who had been in the British Expeditionary Force [EKSPEDItsIONNAYa ARMIYa], but who at present is out of active service and doing a job at the Ministry of Supply because he was seriously wounded. He thinks that he will be returning to service in the regular army in two months’ time. RESERVIST [REZERVIST][iv] has agreed to work with us. He has promised to bring to the next meeting in a fortnight’s time his notes on the campaign in France and information on the way the British Army is organised.

2. RESERVIST reports that the process of reorganizing the army continues. The organisational structure of the Home Forces [ARMIYa METROPOLII]: command [ShTAB OKRUGA], army corps, division. There are individual garrison districts which are directly subordinate to the C.-inBC. Home Forces, e.g. the DOVER Garrison which includes two infantry brigades and one tank division. The composition of an infantry battalion is: two infantry companies, one machine-gun company consisting of two heavy machine-gun platoons and one anti-tank defence platoon. A brigade consists of three battalions. Each brigade deployed in a war zone has its own independent defence sectors and divisional reinforcements are placed under the command of brigades.

3. Tanks are the main item of the work of the Ministry of Supply. [The following][a] are in mass production: 14-ton cruiser tanks and 25-ton ARMSTRONG-WOLSELEY MK-8’s armed with one 37 mm gun and two BROWNING machine-guns (it has been suggested that a machine-gun be tried on the turret for anti-aircraft fire). There were five tank divisions in the British Expeditionary Force in France; he does not know how many tank divisions there are now. 300 light tanks are expected to arrive from SAShA [v]. A battalion of light tanks consists of three companies with 30 tanks per company. A battalion of 25-ton tanks is 40 strong. The different kind of can be explained by the shortage of officers.

---

1 An extra return was added to accommodate overlapping text.
4. In France the British had 25 and 36 mm anti-tank guns. They proved to be too light against the German tanks and were replaced by 75 mm French guns which were successful in action. The arming of units with 49 mm anti-tank guns is now beginning. Anti-tank units are now being brought together into a brigade for training.

5. Artillery batteries are armed with 18 and 25-pounder guns. The LONDON air defence is now using new 6-inch guns as well as the 4.5-inch A.A. guns. They are experimenting with new 4.9-inch A.A. guns.

6. He considers that the War Office [VOEHNOK MINISTERSTVO] is not making the slightest use of the experience of the French and the coastal defence is based on a network of blockhouses that are weak in design with no allowance made for the maneuverability or strong artillery and tank equipment of the SAUSAGE-DEALERS [KOLBASNIKI][vi].

NOBILITY’S REPORT ON HIS VISIT AS A CORRESPONDENT TO A
SEARCHLIGHT BATTERY NEAR LONDON
(1940)

From: LONDON
To: MOSCOW
No: 1232 30th Oct. 40

To DIRECTOR.

Yesterday NOBILITY [ZNAT’][i], in the capacity of a corresp-
odent, saw round 339th Battery of 26th Searchlight Regiment of 1st
A.A. [PVO] Division which is stationed in the ICKENHAM-DENHAM area on
the north-western outskirts of LONDON. He reported the following [1
group unrecovered]:
1. In a regiment there are four batteries, each of four troops
[VZVOD]. A troop consists of two detachments [OTDELENIE]. Each de-
tachment constitutes a self-contained unit with an establishment of
12-13 men, one searchlight, one sound locator, one diesel generator and
one Lewis gun. In all there are 530 men and 24 searchlights in a batt-
ery [ii]. The officers [1 group unrecovered] territorial troops; they
received a [B% special ]type [1 group unrecovered] beginning of the war.

2. A detachment occupies a site 25 metres in diameter. The dis-
tance between detachments is 2.5-9 kilometres. The searchlights are
automatically directed onto the target by means of the data from the
sound locator. The searchlight beams are effective up to a height of
5,000 metres. Detachments are linked to battery and battery is linked
to regiment and to Sector Operations Room [KONTROL’NYJ PUNKT PVO] from
which information about the enemy is sometimes received. The battery

(cont. overleaf)
commander stated that during the last fortnight two SAUSAGE-DEALERS [KOLBASNIK][iii] had been shot down by machine-gun fire.

[21 groups unrecoverable]

No. 301 BRION [iii]

[b] Or “a”.

[c] Strictly speaking the Russian word used for “his” should indicate that the marriage is not that of the subject of the sentence but of some other person previously referred to. It seems likely, however, that this is a piece of loose drafting and that “his” and “he” do stand for one and the same person.

[d] In the original “in” follows “he”. If the 3-group gap were solved, it would be possible to translate in English word order, i.e. the verb would follow “he”, and “in” plus the noun it governs would come later on.

[e] As far as is known the group recovered here stands for the plural “relatives”. It is possible, however, that the singular “relative” was intended in this instance.

Probably the English Christian name IRIS, used as a cover-name for a woman, although there is no proof of this in the text.

The Russian word IRIS means either the flower, or a kind of toffee; in either of these meanings the word seems an unlikely choice as a cover name.

[ii] SONIA: Probably Ursula BUERTON. First occurrence.

No. 400 BRION [iv]

Notes

[a] The following is an alternative reading:
"... had a meeting with [C% a former acquaintance] of Doctor Fuchs who ..."

On technical grounds there is nothing to choose between those two versions. Without collateral it is impossible to say which is the correct one.

[b] It appears from the two previous occurrences of this group that the general sense is "said".
[c] Inserted by the translator. The case ending indicates that the preposition “in” must precede “BIRMINGHAM”.

[d] It is almost certain that this means “papers”, “documents”, etc.

[e] This is a literal translation. The sense is probably: “... will be sent to CANADA so that industrial methods may be used.”
   It is known from collateral that laboratory facilities were found to be inadequate and that the decision was taken to use industrial plant.

[f] There is some evidence that the value of this group is: “Draws attention to”

[g] The structure of the sentence suggests that LEIPZIG should be an adjective and that the passage should read: “... in the LEIPZIG...”
   However the adjectival ending has been tried without success.

[h] This is an elliptical expression which it is exceedingly hard to interpret without the full context.
   “OKAZIEJ”, or more correctly “S OKAZIEJ”, is equivalent to the French “à l’occasion”. To send a report or letter “S OKAZIEJ” means to send it when the opportunity arises.
   “DOKLAD OKAZIEJ” thus suggests that a report was to be sent when an opportunity for sending one arose. If so, the report was presumably to be sent in writing. (BRION could have signalled a report at any time and need not have waited for a suitable opportunity.)

Comments: [i] BARCH: Simon Davidovich KREMER.

[ii] FUCHS moved to BIRMINGHAM on 27th May 1941 and took up his research duties on the following day.

Without the context it is impossible to interpret this passage with any certainty. Possible interpretations are as follows:

1) .. the German families of/to/by the establishment/foundation/institution, HOLAN...
2) ...of the German families of/to/by the establishment/foundation/institution, HOLAN....
3) ... the German families of/to/by the establishment/foundation/institution...
4) ...of the German families of/to/by the HOLAN establishment/foundation/institution.

Or “in/at”

Comments:

[i] BARON:

[ii] PROSTEJOV (MORAVIA/MORAVIYa/): 49.29N, 17.08E. PROSTEJOV - the Czech version of the place name was spelt out in the Latin alphabet. MORAVIYa - the Russian version of MORAVIA - was used and spelt out in Cyrillic.

[iii] HOLAN: unidentified: HOLAN is spelt out in the Latin alphabet. It comes at the end of the recovered passage but there is good technical evidence that it is a complete name. The surname HOLAN is quite common in Czechoslovakia and Austria.

[iv] ... UTTE: Presumably the end of a place name spelt out in the Latin alphabet. There is technical evidence that the letter preceding “U” is “H”.

[v] KLO[C%DNO]: Possibly KLADNO in Czechoslovakia, 50.08N, 14.06E. In Russian the letters “O” and “A” before the stressed syllable are indistinguishable in sound but in this case the stress is on the first syllable and there should be no possibility of confusion i.e., the Cyrillic transliteration should be KLADNO.

Notes:

[a] No external serial number was sent.

[b] Inserted by translator.

[c] The Russian word, RADIOLOKATORY, may refer to radar sets or installations. The next sentence shows that the film was a photocopy of a manual on the subject.

[d] The English is a literal translation of the Russian, which could also be rendered as “code memorandum on signals”. The meaning is probably “memorandum concerning code communications/signals”. The word “code” is unlikely to imply “cipher” unless it is being used loosely by someone unaccustomed to distinguishing between the two.

[e] The Russian word, NASTAVLENIE, is the one generally used for a military manual. The same word is used in paragraph 2.

[f] It is not clear whether pages 70-118 were the ones photographed or omitted. The former is possibly more likely.

[g] There is nothing to show whether this manual had likewise come from BOND. If it had, one might have expected an introductory sentence or heading before paragraph 1.

[ii] “KORABL’ “is normally used in the sense of “Naval vessel”.

Between 18 and 30 November 1945 a transmitter using callsign F2R-1, working from ENGLAND, was in contact with Soviet vessels. The Soviet Embassy transmitter was at this time using callsign F2R. The implication of the suffix is that the transmitter belonged to the Embassy but may not have been located there. The messages passed are in a system resembling Soviet Naval/Naval Air systems of this period.

1.

Commission[iii] is seeking to achieve an agreed report objectively reflecting the state of the Austrian economy by the end

in a form in which it would be indicated that all the circumstances were favourable in AUSTRIA, that the work on demilitarisation

[Continued overleaf]
sixty-two illegal acts on the French side, be sent as an appendix to the report. On the Soviet side we shall be able to reject this form of report and insist that the section headed “dissenting opinions”, in which have would be included subjects under sections of the report not approved by you and opinions [2 groups unrecovered] discussion, be inserted as an integral part of the report. The proposal from the Soviet side that the first report (on the state of demilitarisation) should begin with a general assessment of the military-economic potential of AUSTRIA is giving rise to strong objections. Taking into consideration the previous discussions and counting on support from the French, the Soviet side submitted at the session of the Allied Council[iii] a shortened text of their own previous proposals on the matter [PART II] in question. In these proposals the following is pointed out:

"1. By the end of the war with HITLER’s GERMANY the number of Austrian soldiers and officers in Allied captivity, according to the announcement made by the Austrian Minister of the Interior, Herr HELMER[iv], on 5 August 1946 and 20 January 1947, amounted to 1,200,000, of whom about 820,000 have now returned to AUSTRIA. Taking into account [1 group unrecovered] and persons

[52 groups unrecoverable]

[27 groups unrecoverable]

with this [B% proposal]

[45 groups unrecoverable]

under pressure from the British, the French declared that they did not consider it “absolutely necessary” [B% to include] the Soviet proposal in the report, but

[45 groups unrecoverable]

that in the German Army up to 10% were of Austrian [1 group unrecovered] and that during the war the Germans set up military and Air Force installations in AUSTRIA at the expense of the Austrian economy. After lengthy discussion the Soviet proposal, with which – as regards the question of illegality – the French were in agreement, was recorded as a dissenting opinion. On the question of the liquidation of the military-economic potential in AUSTRIA, the Americans, British and French are preparing on their side to start this [1 group unrecovered] [D% liquidation] from 21 February. The Soviet side recorded

[47 groups unrecoverable]
quadripartite check, our side objected to such a decision. On the question of the presence in AUSTRIA at the present time of military and para-military organisations, the Americans and the British [consider] that all such organisations have been liquidated.

of the Austrian Government and to the presence of para-military organisations operating in AUSTRIA at the present time. In view of the disagreement arising between them, the point of view of each

[11 groups unrecoverable]

[PART III] On the question of the quadripartite check, the British and the Americans refused to recognize the fact

[50 groups unrecoverable]

check on the progress of demilitarisation and the liquidation of the military-economic potential. Our proposal, that the absence in the Allied Council of a plan for the liquidation of the military potential of AUSTRIA and also the absence of a quadripartite check on the progress of demilitarisation should be pointed out in the report, was rejected by the British and the Americans. After this the Soviet proposal was recorded as a dissenting opinion. The same kind of discussions also took place when the report on displaced persons was being considered. The British and the Americans categorically opposed our proposal, which was supported by the French, that a political assessment be made of the displaced persons in AUSTRIA, in which it would be shown that a considerable number of them had fought on the side of HITLER’s GERMANY or collaborated with the Germans. The Allies refused to include displaced persons from the Baltic [regions], the Western UKRAINE and BELORUSSIA in the category of the Soviet citizens and placed them in the category of persons neither repatriable

[2-part message complete]

[PART I] Soviet Military Administration [SVA] in GERMANY – To General VERSHININ[i for Colonel BRYukanov[ii, copy to KLESHKANOV[iii].

I [B% have familiarised myself] with your last report. The documents presented by you are of [D% great] significance and will be used both in planning and for official statements. I approve your firm and steadfast policy towards the British [1 group unrecovered] the question of the repatriation of Soviet citizens. At the same time I note a number of important shortcomings in the work of your group:

1. I consider it incorrect that, in discussions with the British, you tolerate the phrase "Soviet refugees, according to the British concept", which emphasises [B% the provocation]

[38 groups unrecovered]
To slip into accepting the precise concept in the British, American and French interpretation into operation is harmful to our cause.

4. I do not understand the statement on BRITAIN's insistence with officers of the group, what the outlook is likely to be in the work of returning Soviet people to the homeland. The work is not easy, but our people, speak about we are disrupting the plan to send our citizens to settle in other countries, speak about the results produced by this work. Of course, these results are small, but one must work more efficiently. Assemble the officers, or see each one individually – together with the officer in charge of political matters; talk to people: offer encouragement, point out what is lacking, draw general conclusions based on experience; take note of the best ones, but warn the grumblers. Talk about

[PART II] Organize with the people regular political instruction and systematic reports, keep people abreast of events in our country and were not cut short in time. The first case concerns Major NAZAROV - now recalled - who co-habited with a German woman on him by British officers, entered into friendly relations with these officers, with funds, compelling repatriated women to co-habit with men and about which we in the Ministry of Foreign Affairs, and not
and to meet foreigners alone; [C% always] do this [1 group unrecovered] in twos or threes; write down conversations with foreigners and keep a record of this [1 group unrecovered].

2. Live and work [2 groups unrecovered] officers [1 group unrecovered][vi], in separate accommodation; forbid working with or billeting on the local inhabitants.

3. The head of the group and his deputy in charge of political matters (they must not be burdened with administrative duties) must control educational work with the people [LYuDI] and organize political studies. It is particularly important to have control of groups working in isolation, to visit them more often in person, not just to acquire a superficial knowledge but to make a thorough study of the work and conditions.

4. Grant the officers of the group(s) regular leave and provide them with return visas.

   Report when you have carried this out.
