NAFTA

NAFTA Countries are richer each year due to “extra” trade growth

The pure economic payoff for the U.S. is \$400 per person

5 WAYS TO IMPROVE NAFTA

U.S. withdrawal from NAFTA would be incredibly costly.

However, these 5 updates to the agreement could favor both U.S. competitiveness and American workers:

1

Account for recent technological advances.

Now that the Internet and smartphones are everyday tools of business and commerce, issues such as cross-border data flows and exports of digital products should be included in updates of the agreement.

2

Revise customs processes and requirements.

Simplifying customs rules and paperwork would make it easier for small U.S. businesses to take advantage of new online platforms, like Amazon and Etsy, that have made it easier to venture into foreign trade and find buyers abroad.

3

Update NAFTA's rules of origin.

NAFTA includes rules about what percentage of a product must be produced within North America in order to enter the U.S., Mexico, or Canada tariff-free. A detailed analysis should be done to determine how these rules could be strengthened to incentivize investment and job growth in the U.S.

4

Strengthen the NAFTA side agreement on labor rights.

While the countries of North America have already agreed to abide by their own labor laws in a NAFTA side agreement, incorporating labor issues into NAFTA itself could better ensure that companies don't leave the U.S. in an effort to avoid the cost of respecting workers' rights.

5

Eliminate obstacles to service exports.

Since the U.S. has an advantage in the high skill industries that make up much of services trade, like financial and educational services, special emphasis should be placed on eliminating obstacles to these exports.

Further protection of U.S. workers requires investment in workforce development:

Improving basic education

Aligning higher education with labor market demand

Strengthening worker retraining programs
