Chairman of the Board

- Innovating on Clean Energy
- Improving Living Environment
- Enhancing Life Quality

About ENN

ENN “C”-Economy

Reduce, reuse and recycle

Change the way energy is produced, consumed and reused.

Reduce and reserve

Integrated clean energy solutions
Energy Distribution, Energy Services

Smart Energy

Achieve synergies between how energy is created, monitored and conserved.

Efficient use of fossil fuels

Clean use of coal-based energy

Advances in renewable energy

Solar energy

Sustainability Inspired by Energy Innovation

Environmental friendly society

China is dedicated to develop "recycling" economy that bring development while protect the environment.

A change of the economic growth pattern

China is stepping into an intensive growth pattern that is more efficient and has lower consumption and emissions.

新奥向世界的承诺

ENN Promise to the World

创新清洁能源

- Innovating on Clean Energy

改善生存环境

- Improving Living Environment

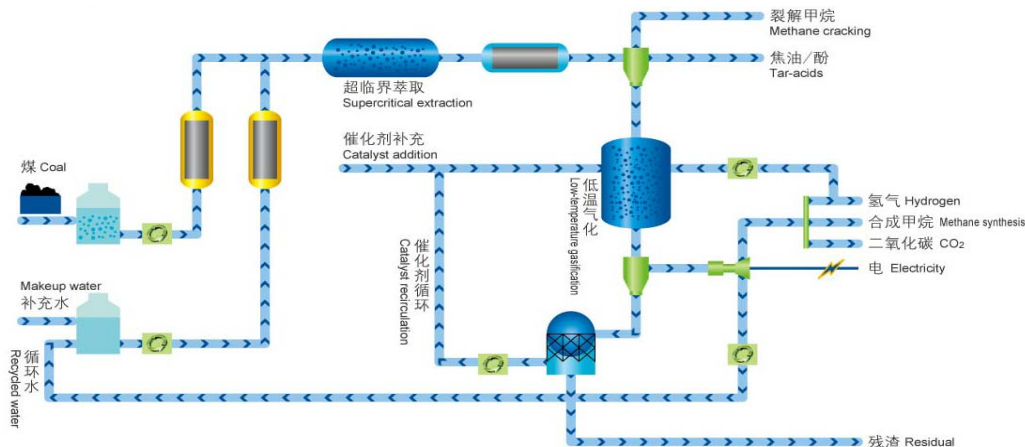

Energy Technologies

System Energy Efficiency

Underground Coal Gasification

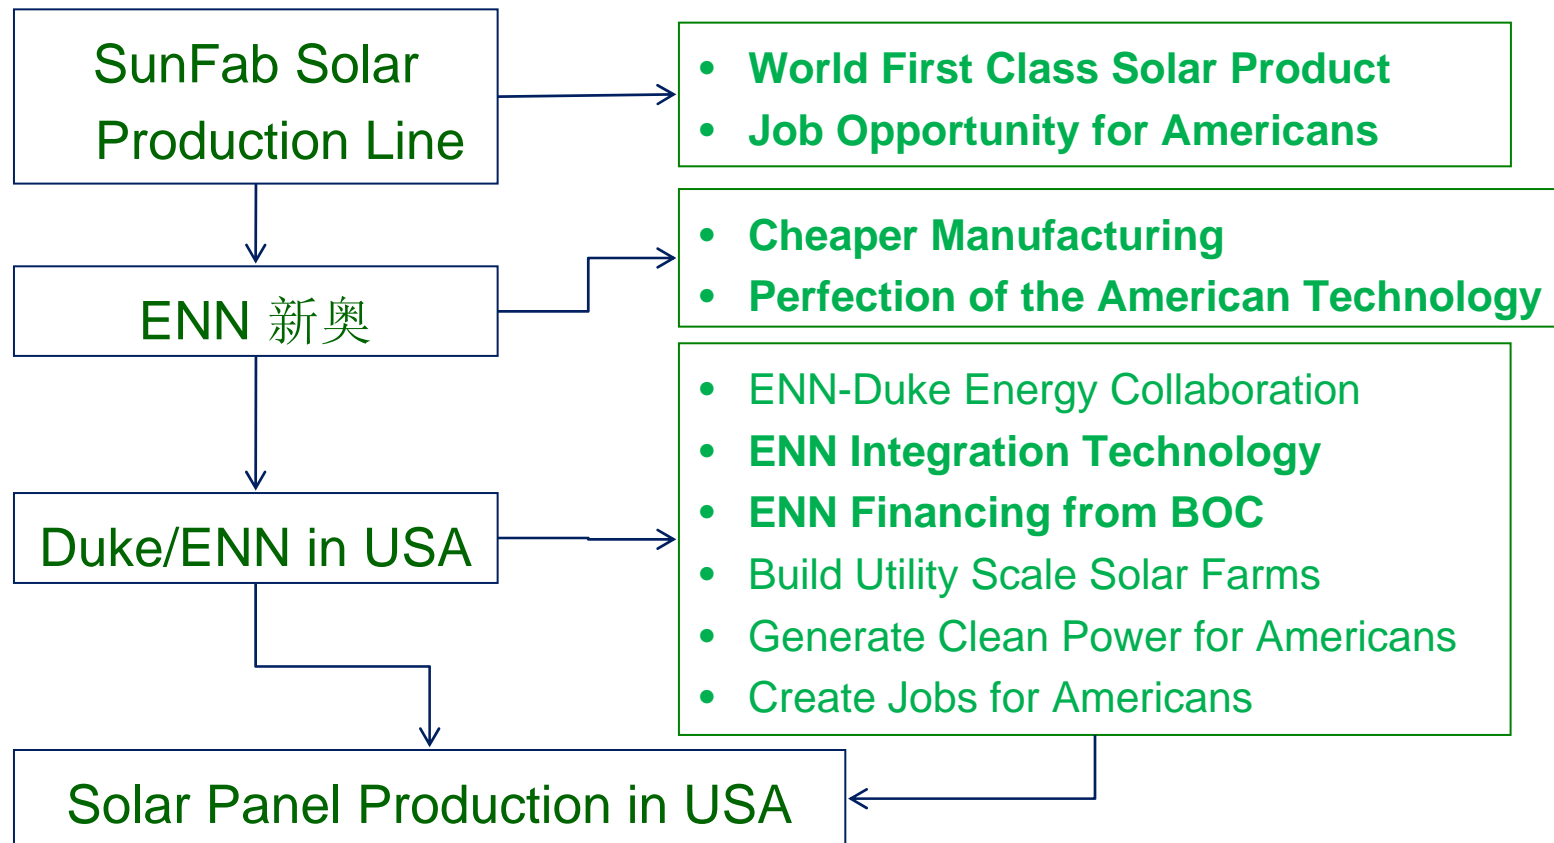

Catalytic Coal Gasification

Algal Bio-Absorption
