As Brazil is gearing up to elect a new leader, what are the central issues concerning its foreign policy? The country's international profile has achieved new heights, both economically and politically. However, a new international engagement will demand new commitments that will encompass all the sectors: financial, military, industrial, social and political. On Sept. 23, three panels of experts will assess the new Brazilian leadership in the international agenda and analyze Brazil's challenges from government and business perspectives. The first panel will focus on the state of Brazil-US bilateral relations. The second panel will examine Brazil's current and evolving foreign policy, followed by the third panel, on economic leadership – international trade and investments.
