

# The Other Half of Gender:

## Working with boys and men for gender equality

Andrew Levack  
Director, Men As Partners  
EngenderHealth

# Outline

- The importance of working with men and boys
- Programmatic examples, issues, and challenges
- The evidence-base of programs working with men and boys

# **Wide recognition of the need to work with men to achieve gender equality**

- ICPD Platform of Action (1994)
- Fourth World Conference on Women (1995)
- Special Session of the General Assembly on HIV/AIDS (2001)
- 2004 Commission on the Status of Women

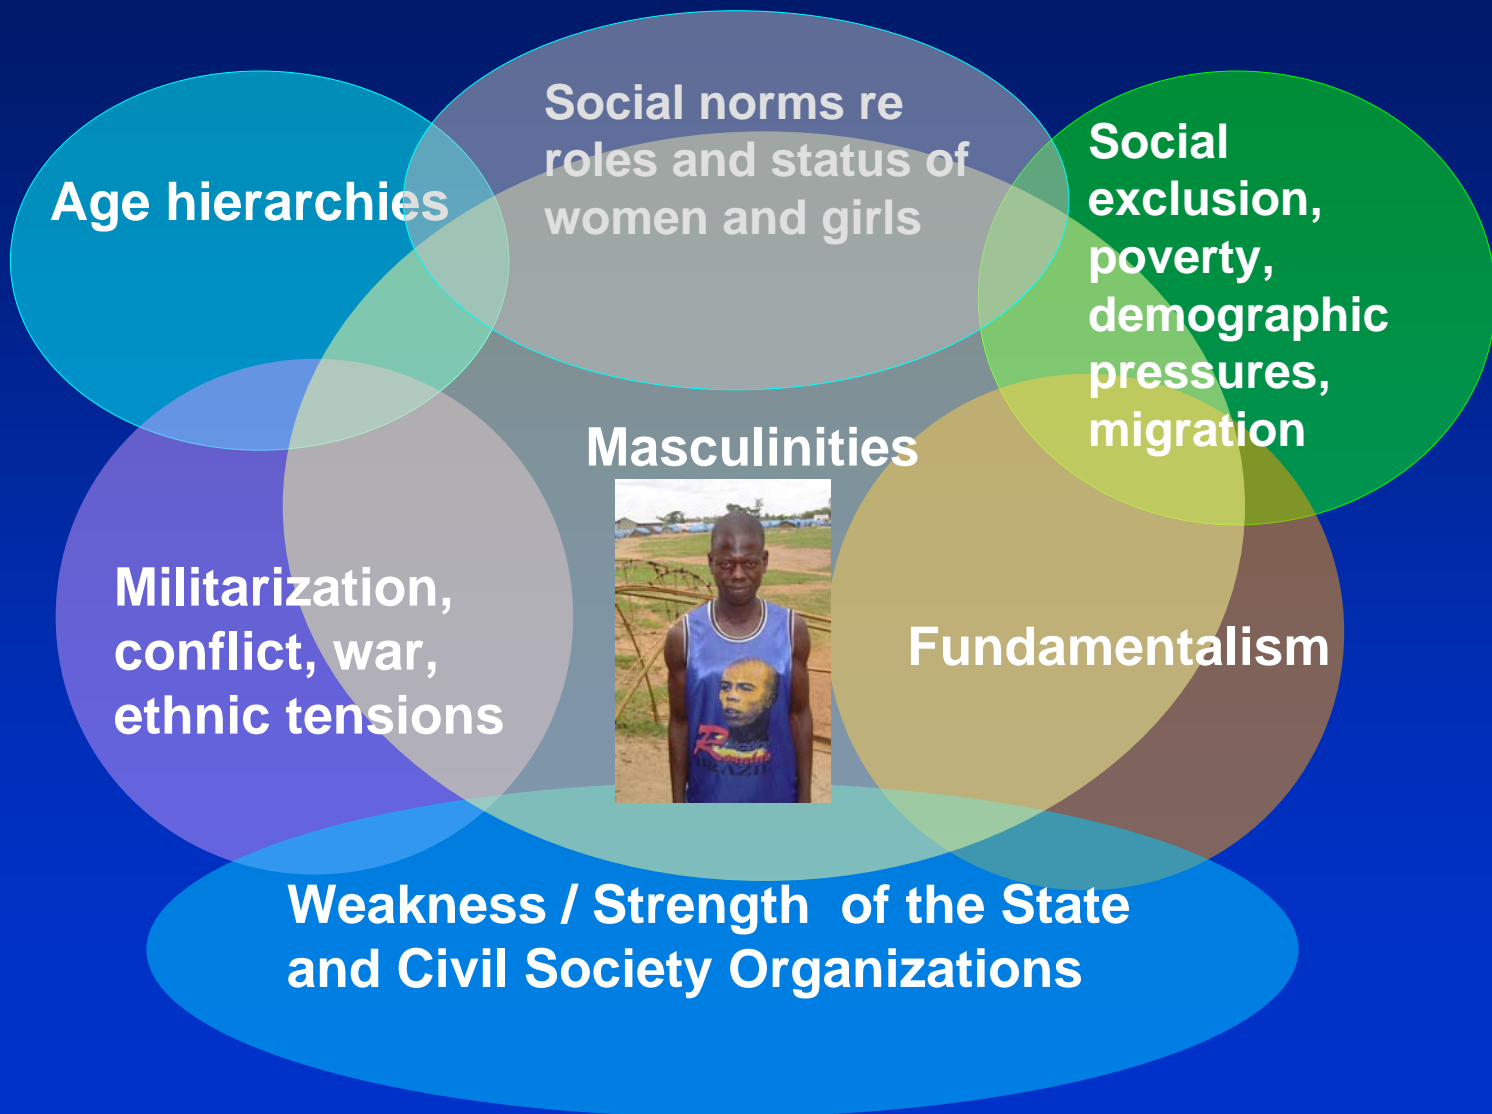

# Focusing on the socialization of boys and men

- Increasing awareness that gender role socialization puts men and their partners at risk of negative health outcomes
- Understanding that it is possible to question this socialization

# **“Act Like a Man”**

- Don't cry
- Be strong
- Don't ask for help
- Have many sexual partners
- Take risks
- Use alcohol and drugs
- Violence is an acceptable way to solve conflict
- Don't act like a woman / don't be gay

# Traditional Views of Manhood as a Risk Factor

**In numerous sample survey studies, gender-related attitudes correlated with men's and boys' ...**

- Self-reported physical violence toward female partners
- Self-reported acts of delinquency
- Number of sexual partners
- Rates of self-reported STI symptoms
- Condom use
- Substance/alcohol use

# How can health programs address gender issues with men?

# “Transformative Programs” – Challenging Male Gender Norms

- Approaches that reinforce negative messages about gender
- Gender-neutral programming
- Gender-sensitive programming
- Transformative programs

*Adapted from - Gupta, SIECUS Report, Vol. 26, No. 5, 2001*

# Areas of Emphasis for Transformative Programs

- Gender-Based Violence
- HIV/AIDS
- Sexual and Reproductive Health
- Family Planning
- Maternal Health
- Fatherhood
- Violence Prevention

I AM A  
PARTNER

**men  
as  
PARTNERS**  
gender equality  
healthy relationships

in my  
community...  
...I speak out on  
violence against women  
365 days a year

I AM A  
PARTNER

**men  
as**  
**PARTNERS**  
gender equality  
healthy relationships

in my  
community...  
...I always use  
condoms

I AM A  
PARTNER

**men  
as  
PARTNERS**  
gender equality  
healthy relationships

in my  
relationship...  
...I do the cooking  
and washing while  
she rests

**OUR STRENGTH**

**IS NOT FOR HURTING.**

So we

**GET TESTED**

for our partners, our communities,  
and ourselves.

Show your strength. Know your HIV status.

**men  
as  
PARTNERS**  
Let's get tested  
together.

# Ecological Model to Create Social Change

Developing advocacy strategies to influence policies and programs that can contribute to gender equity

**Society**

**Community**

**Health System**

**Family**

**Peers**

**Individual**

- Engaging leaders, community outreach, and mobilization
- Addressing social norms
- Providing community groups with information and education

- Training providers to understand gender & RH
- Working with providers and systems to offer male-friendly services

- Creating a family environment that supports changed gender and social norms

- Changing group norms through educational activities
- Increasing peer support for positive gender norms

- Changing individual knowledge, attitudes and skills

# Implementing an Ecological Model

- Small group workshops
- Community Action Teams
- Community Events and Marches
- Supporting Local Institutions
- Fostering Coalitions and Networks
- Improving Health Services
- Campaigns
- Media Coverage
- Policies and legislation

# Program Challenges

- Transformative programming requires significant time, effort, and support.
- Few examples of this work being taken to scale within the public sector.
- Very little work with men addresses broader socio-economic conditions.
- How can policies support men's role in achieving gender equality?
- We have demonstrated individual change, but can we demonstrate societal change?

# Questions of Evidence

- World Health Organization study on evidence-base of health programs targeting men and boys
  - Meta-analysis of 59 evaluated health programs targeting boys and men
  - Will be officially disseminated in May 2007

# Ranking Criteria 1: Evaluation Design

## ***RIGOROUS***

Quantitative data with:

- pre and post test elements.
- control group or regression (or time series data).
- analysis of significance.

AND/OR

- Systematic qualitative data, with clear analytical discussion and indications of validity.

## ***MODERATE***

- Weaker evaluation design, which may be more descriptive than analytic.
- Quantitative data lacking one of the elements listed above
- May include unsystematic qualitative data.

## ***LIMITED***

- Limited quantitative lacking more than one of the elements listed above.

AND/OR

- Qualitative data with description only or process evaluation data only.

# Ranking Criteria 2: Level of Impact

## **High**

- Self-reported *behavior change* (with or without knowledge and attitude change) *with some confirmation, triangulation or corroboration* by multiple actors or stakeholders consulted (including community leaders, health professionals, women/partners).

## **Medium**

- Self-reported *attitude* (with or without knowledge change) change among men (but no behavior change). May include some consultation with stakeholders or multiple actors.

## **Low**

- *Knowledge change only* or unclear or confusing results regarding attitude and behavior change.

## **Ongoing**

# Overall Effectiveness Ranking

## *Effective*

<u>Design</u>	<u>Impact</u>
• Rigorous	+ High
• Rigorous	+ Medium
• Moderate	+ High

## *Promising*

<u>Design</u>	<u>Impact</u>
• Moderate	+ Medium
• Moderate	+ Low
• Rigorous	+ Low

## *Unclear*

<u>Design</u>	<u>Impact</u>
• Limited	+ Low;
• Very Low Impact	
• NB: Cannot score above “Unclear” if research design is limited	

## OVERALL Effectiveness (all themes combined)

<i>Type of Intervention</i>	<i>n</i>	<i>Effective</i>	<i>Promising</i>	<i>Unclear</i>
Group Education	20	-	11	9
Services-Based	8	2	4	2
Community Outreach/Mobilization	8	6	2	-
Integrated (includes more than 1 of the above)	21	6	5	10
<b>TOTAL</b>	<b>57</b>	<b>14 (24.5%)</b>	<b>22 (38.5%)</b>	<b>21 (36.8%)</b>

# Conclusion 1:

## Majority of Programs Confirmed Attitude or Behavior Change with Men

## Conclusion 2:

**Gender Transformative Programs Were Even More  
Effective in Achieving Attitude or Behavior  
Change (n=27 programs)**

Effective Promising Unclear

# Thank You
