

HYDROPOWER, PIPELINES & PETROLEUM

The U.S.-Canada Energy Relationship

April 13, 2011

Fuqua School of Business

Duke University • Durham, North Carolina

8:30 A.M. Conference Registration
Geneen Auditorium, Fuqua School of Business
Coffee and pastries

9:30 A.M. Welcome
Geneen Auditorium

Stephen Kelly, Associate Director of the Center for Canadian Studies

Peter Lange, Provost, Welcoming Remarks

David Jacobson, U.S. Ambassador to Canada
“The U.S.-Canada Energy Relationship”

10:00-11:30 Panel I: Meeting Energy Demand: The CEO’s Perspective
Geneen Auditorium

The United States and Canada both possess immense energy resources, including vast new reserves of unconventional hydrocarbons. Exploiting them together poses special challenges and opportunities. This bi-national panel of energy executives from the oil sands, pipeline, hydroelectric, and shale gas sectors will describe what their companies are doing to assure production while attending to environmental concerns.

Moderator: David Biette, Director, Canada Institute, Woodrow Wilson
International Center for Scholars

Thierry Vandal, President and CEO, Hydro-Québec
Patrick Daniel, President and CEO, Enbridge, Inc.
Rick George, President and CEO, Suncor

11:45-1:15 **Luncheon**
Kirby Reading Room, Fuqua School of Business

Welcome by Blair Sheppard, Dean of the Fuqua School of Business

Keynote address: David Goldwyn, President of Goldwyn International Strategies LLC; former Special Envoy and Coordinator for International Energy Affairs, U.S. State Department

David Goldwyn spent 18 months at the U.S. State Department leading U.S. energy diplomacy around the world. He visited the Canadian oil sands during his tenure, hosted an international meeting on shale gas governance, and is a recognized expert on energy security. He will explain how the U.S.-Canada energy relationship fits into the larger U.S. government international energy picture, as well as shed some light on how the State Department approaches vital cross-border energy issues, such as the proposed Keystone XL pipeline.

1:30-3:00 **Panel II: Energy in Context: Balancing Environment & Security**
Geneen Auditorium

This panel of energy think tank, public policy, academic, and NGO experts will put the U.S.-Canada energy relationship into a broader context, weighing energy security and environmental concerns, and describing new methods and policies that could help us to achieve both.

Moderator: Lincoln Pratson, Professor of Energy & Environment, Nicholas School of the Environment; Director, Duke University Energy Hub

David Pumphrey, Deputy Director and Senior Fellow, Energy and National Security Program, Center for Strategic and International Studies

Janet Peace, Vice President of Markets and Business Strategy, Pew Center on Global Climate Change

Amy Jaffe, Wallace S. Wilson Fellow in Energy Studies and Director of the Energy Forum at the Baker Institute, Rice University

Amb. David Wilkins, partner at Nelson Mullins Riley & Scarborough LLP, former U.S. Ambassador to Canada

3:00 P.M. **Conference concludes**

The conference is free and open to the public thanks to sponsorship from the Government of Canada/ Gouvernement du Canada and the Atlanta Consulate General, the Atlanta Delegation of the Government of Québec, the Duke Center for Canadian Studies, the Woodrow Wilson International Center for Scholars, Duke University's Fuqua School of Business, Sanford School of Public Policy, Nicholas School of the Environment, and the Duke Office of Global Strategies and Programs.
