Why does the IRC prioritize family planning in emergency response?
IRC supports access to family planning as part of primary health care in crises

In 2017, IRC delivered 249,255 couple years of protection in emergencies & fragile states
Contraception and Comprehensive Abortion Care in Emergencies (ConCACE) 2011-present

**Objectives:**

1. Increase access to and quality of FP and CAC in crisis settings
2. Institutionalize FP and CAC within IRC health programs & emergency responses

**2011-2019 Results:**

- 371,096 women and girls started contraception
- 56% chose LARCs
Venezuelan refugee crisis in Colombia

4 million Venezuelans have left their country
1.4 million remain in Colombia.

Colombian health system is strong, highly regulated and insurance-based

Only supports lifesaving care (including deliveries) for Venezuelan migrants/refugees

Most Venezuelans lack access to preventative and curative health services.

111,023 Venezuelans in Cucuta

48% Women

52% Men

27% Children

74,816 Venezuelans in Medellin
IRC implements context-specific models for local capacity sharing for family planning in Colombia.

**Medellin**
*June 2019-Present*
Increasing access to FP in partnership with MetroSalud.

**Cucuta**
*Oct. 2018-Present*
Delivering FP through IRC-run multi-sectoral Comprehensive Care Center with linkages to local health system, Profamilia.
Increasing numbers of Venezuelan clients started contraception at IRC-supported health facilities each month

No. of clients starting contraceptive methods
IRC-supported facilities in Medellin and Cucuta, Oct 2018 - Aug 2019
Half of contraception clients chose LARCs and most were under 25.

**Contaceptive Method Mix, Cucuta & Medellin, Oct. 2018-Aug. 2019**

- IUDs: 16%
- OCP: 2%
- Implants: 35%
- Injectables: 47%

**Age distribution among clients starting contraception, Cucuta & Medellin, Oct 2018 - August 2019**

- 10 to 14: 1%
- 15 to 19: 23%
- 20 to 24: 41%
- 25 to 29: 20%
- 30 to 34: 9%
- 35+: 6%
Women and girls lacking access in Venezuela seek safe abortion care in Colombia

41 clients medication abortion clients treated at IRC-supported facilities

42 clients referred to Profamilia for safe abortion care in Cucuta

Age distribution among IRC-supported SAC clients & referrals, n=81
Oct 2018-Aug. 2019

- 30 to 34: 22%
- 35+: 5%
- 10 to 14: 1%
- 15 to 19: 15%
- 20 to 24: 32%
- 25 to 29: 25%
Lessons learned

- Refugees, migrants face systematic barriers to FP access even in countries with stronger health systems
- Local health actors know the context best, but often lack experience and resources needed to serve displaced, crisis-affected populations
- Strong partnerships between local and humanitarian actors needed to eliminate barriers while avoiding parallel systems

**The Perfect Match**

Strategic partnerships between humanitarian actors, local governments and local organizations create programs to serve the context-specific needs of crisis-affected women and girls
Thank You!
