

# Framework for supporting implementation of NDC mitigation actions

Grzegorz Peszko, Climate Change Group, WBG

## Tailoring WBG NDC support to the stage of NDC development in a country

#### WHAT?

#### **Support for targets**

No INDC or no targets specified (e.g. Senegal, Pakistan, Uzbekistan, GCCs)

#### **Upstream AAA**

- Analyze alternative targets
- Assess impacts of targets
- Analyze co-benefits
- Tools:
  - Engineering bottom up and CGE models

#### HOW?

#### **Implementation support**

INDC has targets but few policies to ensure implementation (most developing countries)

Models

#### Midstream AAA/TA

- Design enabling policy framework to change behavior of investors and consumers
- Design fiscal framework for climate-related policies
- Quantify impacts of policies
- Assess political economy of reform
- Design of specific policy instruments
- Policy MRV

#### **HOW MUCH?**

#### **Financing support**

INDC or the country has adequate enabling policy framework in most sectors

### Downstream Investment and financing support

- Investment and financing planning
- Preparation of investment projects, DPL's, P4R's, or TA
- Financial products (including carbon and climate finance)

## Governments' role: create enabling conditions for NDC implementation by economic agents

### **Modeling NDC implementation**
