Defining Environmental Peacebuilding

- **Environmental peacebuilding** comprises the multiple approaches and pathways by which the management of environmental issues is integrated in and can support conflict prevention, mitigation, resolution and recovery.

Early Waves of Environmental Peacebuilding

- Response to frustration with simplistic environment & conflict debates
- Always about practice and scholarship
- Deductive in early waves
- Heavy early focus on water before diversifying resources & adding climate
- Heavy early focus on transboundary
- Second wave brought helpful critiques with more complexity, more ambiguity, potential shortcomings

The Future(s) of Environmental Peacebuilding

Priority areas for the future:

- Bottom Up Approaches
- Gender
- Using Big Data and Frontier Technology
- Monitoring and Evaluation

Promising areas but also have been neglected areas.
