- **UNITED STATES**: 12%
- **MEXICO**: 1.6%

Willingness to get the vaccine

Agreement with the Statement "If a vaccine for COVID-19 were available, I would get it."

Currently Approved Vaccines

- **CANADA**: Pfizer, Moderna
- **UNITED STATES**: Pfizer, Moderna, Johnson and Johnson, Oxford-AstraZeneca
- **MEXICO**: Sputnik V, CanSino

Vaccination Roll-Out Strategy

**Stage 1**: The initial health care strategy is focused on health workers, particularly those working in critical and high-risk areas.

**Stage 2**: The approach is targeting the general public, ensuring that 80% of the population is vaccinated in each country.

**Stage 3**: The focus is on reaching all age groups, with additional emphasis on vulnerable populations such as older adults and people with underlying conditions.

**Group 1A**: Health care personnel working with high-risk patients

**Group 1B**: Health care personnel working with medium-risk patients

**Group 1C**: Health care personnel working with low-risk patients

**Group 2**: People 50-59 years of age

**Group 3**: People 16-49 years of age

**Group 4**: People 60-69 years of age

**Group 5**: People 70-79 years of age

**Group 6**: People 80 years of age or older

**Note**: The vaccination roll-out strategy may vary based on the availability of vaccines and regional guidelines.
